

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

WILLIAMS COLLEGE

The college owes its origin to an educational bequest of Colonial Ephraim Williams for the purpose of establishing "a Free School" in Williamstown. The charter of this school, which was granted March 8, 1785, reads as follows:

AN ACT for directing the use and appropriation of a charitable donation, made in a certain clause in the last will and testament of Ephraim Williams, Esq., for the support and maintenance of a Free School in Williamstown, in the County of Berkshire; and for incorporating certain persons as trustees, in order more effectually to execute the intention of the testator, expressed in the same.

WHEREAS, Israel Williams, Esq., and John Worthington, Esq., executors of the last will and testament of Ephraim Williams, Esq., deceased, have represented to this court that the said Ephraim Williams, on the twenty-second day of July, Anno Domini one thousand seven hundred and fifty-five, made his last will and testament, in which, after divers bequests, devises, and dispositions, is contained the following clause, viz:

Item: "It is my will, desire, and pleasure that the remaining part of the lands, not yet disposed of, shall be sold at the discretion of my executors, within five years after an established peace; and the interest of the money and also the interest arising from my bonds and notes shall be appropriated towards the support and maintenance of a Free School, in a township west of Fort Massachusetts, commonly called the West Township, forever; provided, the said township shall fall within the jurisdiction of the province of Massachusetts Bay; and provided, also, the Governor and General Court give the same township the name of Williamstown; and it is further my will and desire, that if there should remain any monies of the said above donation for the school, it be given towards the support of a school in the East Township, where the fort now stands; but in case the above provisos are not complied with, then it is my last will and choice that the interest of the above-mentioned monies be appropriated to some pious and charitable uses, in manner and form as above directed in the former part of my last will and testament."

And, whereas the said executors have further represented, that it may be a matter of doubt and uncertainty whether the township mentioned in the above recited clause (which is now incorporated by the name of Williamstown) has so far fallen within the jurisdiction of the province of Massachusetts, now Commonwealth of Massachusetts, in the sense of the testator, as that they might be justified in appropriating the said donation to the support and maintenance of a Free School in the said town; and have submitted their duty to the determination of this court, praying that an act may be passed to declare their duty, and to indemnify them in the execution of the same.

SECTION 1. Be it enacted by the Senate and the House of Representatives, in General Court assembled, and by authority of the same, that the donation made in the clause before recited ought to be presently applied to the use and maintenance of a Free School in the town of Williamstown, in the County of Berkshire, and that in case the said donation shall afford an annual interest more than sufficient for the supporting and maintaining such school in Williamstown, then the surplusage be appropriated to the use and maintenance of a Free School in the tract of land called by the testator East Township, now incorporated by the name of Adams, with other lands, applying and appropriating the said donation to the uses above expressed, and shall be liable to no action or suit in law or equity, on account of such appropriations.

And, whereas the said executors have further prayed that for carrying into complete execution the intention of the testator, a corporation may be created and vested with such powers as may be necessary for that purpose;

SECTION 2. Be it therefore enacted by the authority aforesaid, that William Williams of Dalton, Theodore Sedgwick, Woodbridge Little, John Bacon, Thompson Joseph Skinner, Esquires, the Reverends Seth Swift and Daniel Collins, Mr. Israel Jones and Mr. David Noble, and their successors, to be elected and appointed as hereinafter directed and provided, be, and hereby are, incorporated, and shall be a corporation forever by the name of "The Trustees of the Donation of Ephraim Williams, Esq., for maintaining a Free School in Williamstown"; and that the said trustees and their successors be, and hereby are, vested with all the powers, rights, and immunities, which are by law incident to aggregate eleemosynary corporations.

SECTION 3. And be it further enacted, that the said corporation shall always consist of a number not less than seven, nor more than nine persons, excepting only that whenever a vacancy shall happen by death, removal, refusal, or resignation of any member or members, so that the number be reduced to less than seven, the aforesaid number, then the remaining or surviving trustees shall have full power to perform all corporate acts until such vacancy be supplied; and the said trustees shall elect and appoint a clerk of the corporation, who shall fairly enter and record all votes, acts, orders, and proceedings made, done or passed by the trustees; and shall elect a proper person to be their treasurer, who shall receive into his hands all monies belonging to the corporation, and pay the same pursuant to the order of the trustees, and shall always keep a fair account of all receipts and payments.

SECTION 4. And be it further enacted, that the power of electing and appointing successors in case of the death, removal, refusal, or resignation of any of the trustees be, and hereby is, vested solely in the Supreme Judicial Court of this Commonwealth; and whenever any of the above mentioned cases shall happen, the trustees shall, as soon as conveniently may be, certify the same to the Justices of the said court, that a successor may be appointed; and the Justices of the same court are hereby empowered to remove from office and trust any member of the corporation who shall, in their judgment, be unfit to hold the same, by reason of incapacity, misdemeanor, negligence, or breach of trust.

And to the intent that the said donation may not be wasted, mismanaged, or perverted from its original intention;

SECTION 5. Be it further enacted by the authority aforesaid, that the said corporation, and the donation itself, shall always be under the visitation and direction of the Supreme Judicial Court, who are hereby empowered to visit the said corporation to rectify all abuses, to determine all matters of doubt or dispute touching the duty of the trustees, and the use, application, or appropriation of monies or interests to the same donation belonging; and to make all such orders and regulations with respect to the use, management, and appropriation of the same donation and every part thereof, as they shall judge necessary or useful in order to promote the best interest of the school, according to the true meaning and intention of the testator and such laws of this Commonwealth as may be in force respecting the same; and the said court, whenever they shall judge necessary, shall cause the said trustees to come before them, either

to render an account of expenditures and dispositions of monies, or to answer for any mismanagement or breach of trust; and the trustees shall appear and lay their accounts, papers, records, and corporation books before the said court for inspection, whenever they shall be required thereto.

SECTION 6. And be it further enacted, that the said trustees and their successors forever shall have the possession, management, and disposition of the whole interest and estate, real and personal, which is contained in and given, bequeathed, devised, or disposed of by the above recited clause in the will aforesaid; and they are hereby empowered and directed, as soon as conveniently may be, to erect and maintain a Free School within the said town of Williamstown, for the instruction of youth, in such manner as most effectually to answer the pious, generous, and charitable intention of the testator, and agreeable to such orders and instructions as they may, from time to time, receive from the Supreme Judicial Court; and they are hereby empowered to appoint and employ instructors, masters, and officers, as shall be necessary for that purpose.

And to the intent that the said trustees may be enabled, in the most easy and expeditious manner, to receive in their own possession and management, the whole estate, property, and interest, contained in the aforesaid donation;

SECTION 7. Be it further enacted by the authority aforesaid, that the said executors, shall, at the request of the trustees, make and execute to the said trustees a deed or deeds of conveyance of all such lands or real estate as belong to said donation, and yet remain unsold, in which deed or deeds it shall be expressed that the executors do grant to the trustees the right, estate, and interest of the testator, and of themselves, in and to the described lands or tenements to the trustees and their successors forever; and the said executors shall deliver over into the hands of the trustees, at their request, all such personal securities or mortgages as the executors now have in their own hands, and which are a part of the same donation; all of which securities, whether bonds, promissory notes, mortgage deeds, or of what name or description soever, being endorsed with the name of the said executors, or one of them, and delivered as aforesaid, shall become the property of the trustees to all intents and purposes; and they are hereby empowered, in the name of the corporation, to bring any action or actions against the obligors, promisors, mortgagors, or tenants, for recovering the contents of the same securities or possession of mortgaged estates, which action or actions shall be holden to be good and valid in law for that purpose, as if the securities or

mortgage deeds had been originally made to the trustees by their corporate names.

And, whereas the testator has directed, that in case his principal donations should afford an interest more than sufficient for the support and maintenance of the school in Williamstown, the surplusage should be improved to the use of a school in the East Township, now called Adams, in the said County of Berkshire; and whereas questions and disputes may arise touching the (nature) meaning and extent of this part of the will, and where they may be said to be a surplusage beyond what should be necessary, according to the intent of testator, for the support of the school in Williamstown:

SECTION 8. Be it further enacted, that in case of such surplusage, the said trustees are hereby empowered and directed to use and employ the same for erecting and supporting a Free School in the said town of Adams, in the same manner as has been in this act before provided in respect of the school in Williamstown; and that all questions and disputes that may arise concerning such surplusage, and the duty of the trustees in respect of the several schools, shall be determined by the Supreme Judicial Court; and the trustees shall always conform their conduct and administration herein to such orders and determinations as shall, from time to time, be made by the same court.

SECTION 9. And be it further enacted, that the Supreme Judicial Court may, at their discretion, exercise all the powers vested in them by virtue of this act, at any of the sessions holden within the counties of Berkshire or Hampshire; and in all trials at law, the court, ex-officio, shall take notice of this act to all intents and purposes whatsoever, and the same shall be given in evidence under any general issue.

At their first meeting, April 24, 1785, the trustees passed a resolution to the effect that "it is the sense of the corporation that the Free School in Williamstown be open and free for the use and benefit of the inhabitants of that town and of the free citizens of the American States indiscriminately." They also decided that "it will best coincide with the liberal views of the donor and the intention of the legislature to admit no pupil to the Free School
* * * not having been taught to read English well."

As they found it difficult to collect the necessary funds for erecting a building, the trustees sent a petition, August 19, 1788, to the legislature, "for the grant of a lottery to raise the sum of twelve hundred pounds." Accordingly an act was passed February 11, 1789, making such a grant.

The initial step toward a transformation of the Free School into a college was taken at a meeting of the trustees, May 23, 1792. In a petition to the legislature they "humbly showed" what had been done already, and set forth the "several circumstances attending the situation of the Free School * * * peculiarly favorable to a seminary of a more public and important nature." The petition was granted, and an act to establish the college and to transfer to it the property of the Free School was passed June 22, 1793:

An act to establish a college in the County of Berkshire, within this Commonwealth, by the name of Williams College.

Be it enacted by the Senate and House of Representatives, in the General Court assembled, and by the authority of the same, that there be erected and established in the town of Williamstown, in the County of Berkshire, a college, for the purpose of educating youth, to be called and known by the name of Williams College, to be under the government and regulation of a body politic and corporate, as hereafter in this act is provided.

And be it further enacted by the authority aforesaid, that John Bacon, Esq., Rev. Daniel Collins, Israel Jones, Woodbridge Little, David Noble, Theodore Sedgwick, Thompson J. Skinner, Esquires, Rev. Seth Swift, Henry Vanscaak, Esq., Rev. Stephen West, D.D., William Williams and Elijah Williams, Esquires, together with the president of the said college for the time being, to be chosen as in this act is hereafter directed, be and hereby are created a body politic and corporate, by the name of "The President and Trustees of Williams College," and that they and their successors, and such others as shall be duly elected members of the said corporation, shall be and remain a body politic and corporate, by that name forever.

And be it further enacted by the authority aforesaid, that for the more orderly conducting the business of the said corporation, The President and Trustees shall have full power and authority, from

time to time, as they shall determine, to elect a vice president and secretary of the said corporation, and to declare the tenures and duties of their respective offices, and also to remove any trustee from the said corporation, when, in their judgment, he shall be rendered incapable, by age or otherwise, of discharging the duties of his office, or shall neglect or refuse to perform the same, and to fill up all vacancies in the said corporation, by electing such persons for trustees as they shall judge best. Provided, nevertheless, that the number of the said trustees, including the president of the said college, for the time being, shall never be greater than seventeen nor less than eleven.

And be it further enacted, that the said corporation may have one common seal, which they may change, break or renew, at their pleasure; and that all deeds signed and delivered by the treasurer, and sealed with their seal, by order of The President and Trustees, shall, when made in their corporate name, be considered in law as the deed of the said corporation; and that the said corporation may sue and be sued in all actions, real, personal or mixed, and may prosecute and defend the same to final judgment and execution, by the name of The President and Trustees of Williams College; and that the said corporation shall be capable of having, holding and taking in fee simple of any less estate, by gift, grant, devise or otherwise, any lands, tenements or other estate, real or personal. Provided, nevertheless, that the annual clear income of the same shall not exceed the sum of six thousand pounds.

And be it further enacted by the authority aforesaid, that the said corporation shall have full power and authority to determine at what times and places their meetings shall be holden and in the manner of notifying the trustees to convene at such meetings; and also from time to time, elect a president and treasurer of said college, and such professors, tutors, instructors and other officers of said college as they shall judge most for the interest thereof, and to determine the duties, salaries, emoluments and tenures of their several officers aforesaid; the said president, for the time being, when elected and inducted into his office, to be, ex-officio, president of said corporation. And the said corporation are further empowered to purchase or erect, and to keep in repair, such houses and other buildings as they shall judge necessary for the said college; and also to make and ordain, as occasion may require, reasonable rules, orders and by-laws, not repugnant to the laws of this Commonwealth, with reasonable penalties, for the good government of the said college; and also to determine and prescribe the mode of ascertaining the qualifications of the students, requisite to their

admission; and also to confer such degrees as are usually conferred by universities established for the education of youth. Provided, nevertheless, that no corporate business shall be transacted at any meeting, unless seven at least of the trustees are present; and provided further, that the said corporation shall confer no degree other than those of Bachelor of Arts and Master of Arts, until after the first day of January, which shall be in the year of our Lord one thousand eight hundred.

And be it further enacted by the authority aforesaid, that the clear rents, issues and profits of all the estates, real and personal, of which the said corporation shall be seized or possessed, shall be appropriated to the endowment of said college, in such manner as shall most effectually promote virtue and piety, and the knowledge of such of the languages, and of the liberal arts and sciences as shall hereafter be directed from time to time, by the said corporation.

And be it further enacted by the authority aforesaid, that the Hon. Thompson J. Skinner, Esq., be, and he is hereby authorized and empowered to fix the time and place for holding the first meeting of the said corporation, of which he shall give notice by an advertisement in the Stockbridge newspapers, at least fourteen days previous thereto.

And be it further enacted by the authority aforesaid, that the treasurer of the said college shall, before he enter upon the execution of the duties of his office, give bonds to the said corporation, with such sums, and with such sureties as they shall approve of, conditioned for the faithful discharge of the said office, and for rendering a just and true account of his doings therein, when required. And that all the money, securities and other property of The President and Trustees of Williams College, together with all the books in which his accounts and proceedings as treasurer were entered and kept, that shall be in his hands at the expiration of his office, shall, upon demand made upon him, his executors or administrators, be paid and delivered over to his successor in that office. And all monies recovered by virtue of any suit at law, upon said bond, shall be paid over to the president and trustees aforesaid, and subjected to the appropriation above directed in this act.

And be it further enacted by the authority aforesaid, that the Legislature of this Commonwealth may grant any further powers to, or alter, limit, annul or restrain any of the powers by this act vested in the said corporation, as shall be judged necessary to promote the best interest of the said college; and, more especially,

may appoint and establish overseers or visitors of the said college, with all necessary powers and authorities for the better aid, preservation and government thereof.

And be it further enacted by the authority aforesaid, that all the property, real and personal, belonging to the trustees of Williamstown Free School, be, and the same hereby is vested in the corporation, which by this act is created.

And be it further enacted by the authority aforesaid, that there be, and hereby is granted to the trustees of Williams College, for the use, benefit and purpose of supporting said college, twelve hundred pounds, to be paid out of the treasury of this Commonwealth; three hundred pounds of the same to be paid the first day of September, one thousand seven hundred ninety-three, and three hundred pounds annually, on the first day of September, for the three succeeding years.

February 26, 1796, an additional act was passed, as follows:

WHEREAS, Doubts have arisen, whether the rights and credits which, previous to passing the act aforesaid, were vested in and belonging to the trustees of the donation of EPHRAIM WILLIAMS, Esquire, for maintaining a Free School in WILLIAMSTOWN, are by virtue of the same act transferred to and vested in the corporation of THE PRESIDENT AND TRUSTEES OF WILLIAMS COLLEGE:

Be it therefore enacted by the Senate and House of Representatives, in General Court assembled, and by the authority of the same, that the said rights and credits be and hereby are transferred to and vested in the said Corporation of THE PRESIDENT AND TRUSTEES OF WILLIAMS COLLEGE, who are hereby authorized to commence and prosecute to final judgment and execution, any suit or action in law or equity, which the said trustees of the donation of EPHRAIM WILLIAMS, Esquire, for maintaining a free school in WILLIAMSTOWN, might heretofore have commenced or prosecuted.

On petition of the trustees the legislature passed an act February 4, 1796, granting the college two townships of land "of the contents of six miles square each, to be laid out and assigned from any of the unappropriated lands belonging to this Commonwealth in the district of Maine." The act provided that the trustees "shall cause to be settled fifteen families in each of said townships within

twelve years from the passing this resolve; and also that there be reserved in each township three lots of three hundred and twenty acres each for the following uses, viz., one lot for the first settled minister, one lot for the use of the ministry, and one lot for the use of schools in each of said townships." These lands were sold for about \$10,000, and the proceeds devoted to building East College.

Nine years later the college again appealed to the legislature for assistance. A committee of that body, which investigated the condition and prospects of the institution, made the following report, February 19, 1805:

The Committee of both Houses, to whom was referred the petition of The President and Trustees of Williams College, praying the aid of government to enable them to build a chapel for the performance of divine service, and for keeping the college library and apparatus, having examined the origin, rise, and progress of the seminary, from its institution to the present time, together with the aid heretofore afforded by the government, and the existing state of its funds, beg leave to observe, That the funds granted by the original donor and the government have, in the opinion of the Committee, been judiciously applied to the object of the institution, and with success exceeding the most sanguine expectations, and that the present state of the college affords a reasonable and pleasing expectation of its future extensive benefits to society, and that a chapel for the purposes above mentioned would essentially promote the same; and as the encouragement and grants of the government to that college have not been equal to those made to other seminaries in the Commonwealth, the Committee ask leave to report the following resolve:

Resolved, For reasons set forth in the petition, that there be and hereby is granted one township of land of the contents of six miles square to be laid out and assigned from any of the unappropriated lands belonging to the Commonwealth, in the District of Maine, except the ten townships lately purchased of the Penobscot Indians.
* * *

In 1809 the legislature granted another township of land in Maine "for further aid in support of Williams College and for the erecting of other buildings for the convenience of the institution and for sustaining a pro-

fessor of the Oriental languages." The sum of \$9,500 was realized from the last two townships.

The legislature passed an act February 24, 1814, "for the Encouragement of Literature, Piety and Morality and the Useful Arts and Sciences," and appropriated the taxes due to the Commonwealth from the Massachusetts Bank, "for the ten years next to come," to Harvard, Williams, and Bowdoin. Of this fund Williams received "three-sixteenths parts," which amounted to \$30,000. In 1859 the State gave the College \$25,000, and in 1868, \$75,000. The total of these legislative gifts is \$153,500.

In 1883 the following act was passed:

An act to authorize The President and Trustees of Williams College to hold additional real and personal estate.

[Be it enacted, etc., as follows:]

SECTION 1. The proviso in section 4 of the act establishing Williams College, passed on the twenty-second day of June in the year seventeen hundred and ninety-three, is hereby amended so as to read: "Provided, nevertheless, that the clear annual income of the same shall not exceed two hundred thousand dollars."

SECTION 2. This act shall take effect upon its passage.

In 1890 the legislature passed the following act:

The corporation known as the President and Trustees of Williams College and its standing committees may hold special meetings without the limits of the Commonwealth.

The principal college buildings, with the dates of their erection and their approximate cost, are as follows: West College, 1790, \$11,700; East College, 1798, \$12,400—burned in 1841, rebuilt, 1842, \$7,000; South College, 1842, \$5,000; Griffin Hall, 1828, \$10,000; Hopkins Observatory, 1837, \$3,000; Lawrence Hall Library, 1846, \$7,000; Jackson Hall, 1856, \$4,000; Alumni Hall Chapel, 1859, \$20,000; College Hall, 1872, \$5,000; Clark Hall, 1881, \$25,000;

Field Memorial Observatory, 1882, \$8,000; Morgan Hall, 1882, \$82,400; Lasell Gymnasium, 1886, \$50,000; Library Extension, 1890, \$10,000; Hopkins Memorial Hall, 1890, \$87,800; Thompson Chemical Laboratory, 1892, \$60,000; Thompson Biological Laboratory, 1893, \$60,000; Thompson Physical Laboratory, 1893, \$60,000; College Infirmary, 1895, \$10,000; Jesup Hall, 1899, \$35,000. Total, \$573,300

TERMS OF ADMISSION

Every candidate for admission must present a testimonial of good character from the teacher under whom he was prepared for college. This must be submitted before the attendance on college exercises begins.

Candidates for admission to the Freshman class must present satisfactory qualifications in one of the following groups of subjects, the work covered by each subject being given in detail below. Groups I, II, III, IV, and V admit to a course leading to the degree of Bachelor of Arts; Group VI admits students to a partial course not leading to a degree, but permitting them to take such college courses as they are prepared to pursue, subject to the conditions specified on page 35.

GROUP I

English
French 1 or German 1
 Greek
 History I
 Latin
 Mathematics A

GROUP II

English
 French 1
 French 2
German 1
 History I or II
 Latin
 Mathematics A

GROUP III

English

 Mathematics A
 Mathematics I

GROUP VI

(Partial Course)

English
 French 2 or
 German 2 or
 Greek or
 Latin
 *History I, II, or III
 Mathematics A

*If Latin is offered, History I or II is required; otherwise the candidate may present either History I, II, or III.

Subjects in italics above are not *required* for admission, but may be taken in college. If these subjects are offered at entrance, the requirement for graduation is fifty-nine hours of college work; otherwise that requirement is sixty-two hours, as heretofore.

The names of students who enter as candidates for a degree but have somewhat serious deficiencies or irregularities in their entrance records, are classified in the partial course group at the end of the class-lists until the deficiencies or irregularities have been removed.

DETAILS OF SUBJECTS

ENGLISH Two sets of books are prescribed for preparation in English, the A-group and the B-group; those in the A-group are for reading, and practice in the essentials of composition and grammatical construction; those in the B-group for more extended study.

A-group The candidate will be required to show a general familiarity with the subject-matter of the books contained in this list, and to answer questions on the lives of the authors. An important element of the examination will be the writing of paragraphs on topics chosen from the books assigned. The treatment of the topics thus presented will be taken as evidence of the candidate's power to express his thoughts with clearness and accuracy. *Work that is notably deficient in spelling, punctuation, idiom, and proper division into paragraphs will not be accepted as satisfactory.*

The books prescribed for this part of the entrance work are:—

1904, 1905, 1906: Shakespeare's *The Merchant of Venice* and *Julius Caesar*; The *Sir Roger de Coverley Papers* in *The Spectator*; Goldsmith's *The Vicar of Wakefield*; Coleridge's *The Ancient Mariner*; Scott's *Ivanhoe*; Carlyle's *Essay on Burns*; Tennyson's *The Princess*; Lowell's *The Vision of Sir Launfal*; George Eliot's *Silas Marner*.

B-group The examination on this part of the work presupposes a more careful study of the books prescribed, and a thorough familiarity with them as works of literature and with their authors as representative writers.

The books set for this part of the examination are:—

1904, 1905, 1906: Shakespere's *Macbeth*; Milton's *Lycidas*, *Comus*, *L'Allegro*, and *Il Penseroso*; Burke's *Speech on Conciliation with America*; Macaulay's *Essays on Milton and Addison*.

Note: In the examination on both groups the candidate will be expected to answer such questions on English grammar as may be proposed. Preparatory schools are urged to give thorough and systematic drill in the principles of grammar and in elementary composition, particularly in the development of the paragraph from a given topic-sentence, with due attention to unity and coherence.

FRENCH I

The elementary examination will be adapted to the proficiency of those who have studied French in a systematic course of five hours a week for one year. It will consist of two parts (which, however, cannot be taken separately): (a) The translation at sight of ordinary prose. The passages set for translation will be suited to candidates who have read not less than four hundred duodecimo pages from the works of at least three different authors; this amount includes sight-reading done in the class. Not more than half the reading should be from works of fiction. It is important that all translations be done into clear and idiomatic English. (b) The translation into French of English sentences and of a short connected passage, to test the candidate's familiarity with elementary grammar. Elementary grammar is understood to include the conjugation of regular and the more usual irregular verbs, such as *aller*, *tenir*, *pouvoir*, *savoir*, *voir*, *vouloir*, *dire*, *faire*, and those belonging to the classes represented by *dormir*, *ouvrir*, *connaître*, *conduire*, *craindre*; the forms and positions of the personal pronouns; the uses of other

pronouns and of possessive, demonstrative, and interrogative adjectives; the inflection of nouns and adjectives for gender and number, except rare cases; the commoner uses of the article; and the partitive constructions. Proficiency may also be tested by direct questioning. Pronunciation should be carefully taught and the pupil should be accustomed to hear and understand the spoken language. The writing of French from dictation is also recommended.

FRENCH 2

The advanced examination will consist of two parts (which may be taken separately): (a) The translation at sight of standard French. The passages set for translation will be suited to candidates who have read not less than one thousand duodecimo pages of classical and contemporary prose and verse from the writings of at least five standard authors. (b) The translation into French of disconnected English sentences and a passage of English prose. In preparation for this examination candidates will be expected to have acquired a thorough knowledge of accidence and a familiarity with the essentials of French syntax, especially the use of modes and tenses, and with the commoner idiomatic phrases. Proficiency may also be tested by direct questioning. Careful attention should be paid to pronunciation and to the use of spoken French, that the candidate may at least acquire the ability to follow a recitation conducted in the language and to answer questions asked by the instructor.

Candidates who offer French 2 are expected to have studied the language for at least three years before presenting themselves for examination. They are not required to take the examination in French 1.

GERMAN 1

(a) Ability to translate ordinary prose at sight; in preparation for this the student should have read two hundred and fifty pages of narrative prose. (b) Proficiency in elementary grammar, including the rules for the arrangement of German sentences, and in translating simple prose from English into German. Attention should be paid to a distinct pronunciation of the language.

GERMAN 2

(a) One hundred and fifty pages of prose fiction; also Freytag's *Aus dem Staat* Friedrichs des Grossen,

Lessing's *Minna von Barnhelm*, Schiller's *Wilhelm Tell*, and Goethe's *Hermann und Dorothea*. A knowledge of the lives of Lessing, Goethe, and Schiller is required; Kluge's *Geschichte der deutschen National-Litteratur* (§§ 48 and 51-57) is suggested as indicating the amount. While reading at sight will be an essential part of the examination, the candidate will be tested on the works given above with regard to both language and subject-matter. Equivalents will be accepted, but the candidate must have read one standard work of Lessing, Goethe, and Schiller, one historical essay, and one modern novel, corresponding to the above. Approval of substitutes should be obtained from the department previous to the examination. (b) There will also be an exercise in prose composition, for which purpose the candidate should have translated about seventy-five pages of narrative prose from English into German.

Candidates who offer German 2 are expected to have studied the language for at least three years before presenting themselves for examination. They are not required to take the examination in German 1.

GREEK

Hadley and Allen's or Goodwin's *Grammar*; translation into Greek of English passages based on Xenophon; Xenophon, four books of the *Anabasis*; Homer, three books of the *Iliad*; translation at sight of passages of less difficult Greek prose. Candidates are expected to pronounce Greek according to the written accents, and in conformity with §§ 11, 14, 19, 20, and 21 of Hadley and Allen, or according to Goodwin's preface and § 28 of his revised edition. The unabridged, or the intermediate, edition of Liddell and Scott's *Greek Lexicon* is also recommended, but not any abridged lexicon.

HISTORY I

Greek to the death of Alexander, and Roman through the reign of Trajan: Smith's *Smaller History of Greece*, Oman's or Meyer's *History of Greece*, and Botsford's *History of Rome* are recommended. The related geography is also included.

HISTORY II

Roman through the reign of Trajan, and either Montgomery's *English History* or Montgomery's *Student's American History*, or equivalents: Botsford's

History of Rome is recommended. The related geography is also included.

HISTORY III Montgomery's English History and Montgomery's Student's American History, or equivalents The related geography is also included.

LATIN Grammar; translation of connected English passages into Latin prose; Caesar, four books; Cicero, six orations; Vergil, six books of the Aeneid, including prosody; translation at sight of passages from Nepos and the Metamorphoses of Ovid Equivalents from other authors will be accepted in part.

MATHEMATICS A Algebra A: Algebra through the binomial theorem for positive integral exponents, including simultaneous quadratics, ratio and proportion, and progressions

Geometry A: Plane Geometry, demonstrations, constructions, applications, and original problems

MATHEMATICS I Algebra I: binomial theorem for negative and fractional exponents, undetermined coefficients, partial fractions, reversion of series, logarithms, continued fractions, and permutations and combinations*

Geometry I: Solid Geometry, including also problems and propositions for original demonstration dependent on easy deductions from the standard propositions given in the text-books

Trigonometry: Plane Trigonometry, including the practical use of logarithmic tables in the solution of triangles

PRELIMINARY EXAMINATIONS

Preliminary examinations in a part of the requirements for admission will be given one year in advance to candidates desiring them, provided they bring from the principals of their schools certificates specifying the subjects in which their teachers consider them prepared. The examination will cover the whole of each subject offered by the candidate. For example, Algebra A, Cicero, or Xenophon cannot

*For admission to the class of 1909 and later classes, the requirement in Algebra I will include the elements of determinants.

be divided between the preliminary and the final examinations.

In order to prevent an interruption to studies which are to be continued in the college course, candidates are requested to reserve the following subjects for the final examination: Cicero or Vergil, Greek Prose Composition, Latin Prose Composition, English B, Algebra A or Geometry A (or Mathematics I, if the admission group is IV or V), and Homer. The subjects thus reserved can be passed in the preliminary examinations only by reaching a mark of seventy-five instead of sixty as required in other subjects.

No credit will be given for the preliminary examination unless the applicant pass in a substantial part of the subjects offered. The preliminary certificate will be valid for one year only, unless the examination has been passed in a specially creditable manner.

ARRANGEMENT OF EXAMINATIONS

The examinations for admission will be held in room No. 8, Hopkins Hall, on the Saturday, Monday, Tuesday, and Wednesday preceding Commencement, and the Saturday, Monday, Tuesday, and Wednesday before the beginning of the college year in September, as follows:

SATURDAY

- 9 A.M.—French
- 2 P.M.—German

MONDAY

- 9 A.M.—English
- 11 A.M.—Greek and Roman History
English and American History
- 2 P.M.—Greek

TUESDAY

- 9 A.M.—Latin
- 2 P.M.—Mathematics

WEDNESDAY

- 9 A.M.—Chemistry I
- 2 P.M.—Biology I, Physics I

Entrance examinations in June will be held on the same days and in the same order as in Williamstown, at any responsible school which has candidates for admission and which will undertake to conduct the examinations on the same dates and in the same order as indicated above, and will do this without expense to the college. The student's written work in such cases is to be forwarded at once by the teacher in charge to the Dean or the Secretary of the Faculty. If sent later than the morning of the day following the last examination, the Committee on Admissions may decline to consider the application.

Requests for the examination papers for use in distant schools under this arrangement must be made by the principals and should be in the hands of the Dean or the Secretary of the Faculty not later than June 10th.

The September examinations are held in Williamstown only.

Certificates showing that candidates have passed the examinations of the College Entrance Examination Board in subjects required for admission to Williams College will be accepted as valid for the subjects which they cover.

ADMISSION BY CERTIFICATE

Under certain conditions specified below, certificates of preparatory schools are accepted in place of examinations in English, Greek, History, Latin, and Mathematics A. Certificates will in no case be accepted for French 1, French 2, German 1, German 2, Mathematics 1, or for the anticipation of any course of study pursued in college. The privilege of sending students by certificate may be granted to a school which requests it, provided the Faculty of the college have such information concerning the work of the school as will warrant granting the request. In general, a school which has recently sent properly trained students by examination is considered entitled, on application, to receive

the certificate privilege and to retain it so long as there is no radical change in the management of the school.

This privilege is not granted to private tutors; and it is revocable in all cases when, in the opinion of the Faculty of the college, it is not properly exercised.

Certificates must be made out on blank forms furnished by the Dean, and in accordance with the instructions contained therein. These certificates must contain an explicit statement of the work done by the candidates and the time devoted to it. If the work covered by the certificate is considerably less than the amount required for admission, or if the time devoted to a given subject seems inadequate, the certificate will not be accepted for the subject in which such deficiency appears, though it may remain valid for other subjects. In such cases an examination upon the subjects involved will be required. For slight deficiencies conditions may be imposed.

A course of study which provides four full school years for Latin and three for Greek is regarded as adequate to give the proper preparation in those subjects.

A student who has failed to pass the entrance examinations at this or any other college, will not be received by certificate unless he has had, since such failure, at least a year of study in the school which issues the certificate.

Freshmen who have entered by certificate and have subsequently been dismissed for failure in their studies may re-enter with the next class on passing the entrance examinations. Certificates will not be accepted in such cases. If students thus dismissed were originally admitted by examination, they may be excused from examination in certain subjects, if, in the judgment of the Committee on Admissions, their records warrant such exemption.

Certificates must be signed by the principal of the school and sent to the Dean, so far as is practicable, before Commencement, but not in advance of the actual completion of the work for which they vouch.

When a year or more has passed between the completion of the work for which the certificate vouches and the time for the student to enter college, satisfactory evidence that he has kept up his studies in the interval is required.

All correspondence in matters of admission should be addressed to the Dean.

ANTICIPATION OF COLLEGE COURSES

I Subjects in the entrance groups

Any college course included in the entrance groups on page 25 of the catalogue, and the courses announced as Biology I, Chemistry I, and Physics I, will be counted towards a degree, if offered in addition to the subjects required in any one group. Examinations in such additional subjects may be taken at the time of the regular entrance examinations in June or September and a mark of fifty is necessary for passing. Students will not be required to substitute other courses after entrance in place of those anticipated, provided only that the number of hours per week must never be less than twelve.

II Subjects not in the entrance groups

No student, except by special vote of the Faculty, will be allowed to anticipate by examination a course of study not included among those mentioned in the above paragraph unless he gives evidence of having had satisfactory instruction in the subject in some school or college. In such anticipatory examinations a mark of seventy-five will be required.

GRADUATION IN THREE YEARS

A student who is able to anticipate at entrance, in accordance with the above rule, two college courses may, by taking nineteen hours for two years, and eighteen hours for the third year, complete the required work in three years; but the Faculty may decline to permit a student to do this if his general scholarship is not of a sufficiently high character.

ADMISSION TO ADVANCED STANDING

Candidates for admission to advanced standing will be examined in the courses that have been pursued by the classes which they wish to enter, or in other equivalent courses.

Students who come from other colleges and who bring certificates of honorable dismissal may, upon proof of their qualifications, be admitted to a corresponding standing in this college.

REGULATIONS CONCERNING PARTIAL COURSE STUDENTS

A candidate for the partial course must have studied some foreign language, ancient or modern, with such proficiency as to enable him to continue it with some college course other than an elementary one, and he will be required to include this advanced course among his first year studies. No student who offers French or German will be permitted to take elementary French or German after admission.

The requirements in Greek and Latin (if either is offered in place of French or German) and in English, History, and Mathematics are the same as for the full course. See Group VI, page 25.

Partial course Freshmen must take at least seven hours a week with the Freshman class, unless they can anticipate by examination a full year's work in one or more of the Freshman courses, in which case they may take a corresponding number of hours with a higher class. They are expected to continue each study chosen through the college year or till the termination of that course, and, in general, to fulfill as far as possible the requirements made of students in the full course.

Partial course students may be excluded from any course or dismissed from college at any time if the Faculty are convinced that they are not qualified to do their current work or are not making good use of their opportunities.

COURSES OF INSTRUCTION

DEPARTMENTS OF LANGUAGE AND LITERATURE

DEPARTMENT OF GREEK

Professor HEWITT, Assistant Professor KELLOGG, and Mr. CLARK

1a Diodorus, Herodotus, Thucydides, and Xenophon Portions of these historians as found in Fernald's Selections will be read. Different portions are selected in consecutive years. Much time will be given to a systematic review of Greek forms and syntax, for the latter constant use being made of Bevier's Greek Syntax. A course of lectures will be given and reading assigned on Greek history, economic and political.

Required course for Freshmen in Group I

Four hours a week until Christmas

Mr. CLARK

1b *Homer* Books V, VI, VII, and VIII of the *Odyssey* will be read and some of the principal Homeric questions will be discussed in lectures. The instructor will give to the class several readings from portions of the poem not prescribed for the daily work.

There will also be lectures, illustrated with photographs, lantern views, and other material, upon the remains of Greek architecture and upon certain other Greek antiquities.

Freshman required course

Four hours a week from Christmas to Easter

Professor HEWITT

1c *Lysias* Morgan's edition is used. Special attention will be given to the political and social allusions which abound in the orations of *Lysias*. Different orations from those read the previous year will be selected. Greek composition

Freshman required course

Four hours a week after Easter

Assistant Professor KELLOGG

The course in Sophomore Greek, 2a and 2b, may be reckoned as a three-hour or a four-hour course, according as a student wishes or not to devote a fourth hour to New Testament Greek.

2a *Plato and Xenophon* The *Protagoras* of Plato or Selections from the *Memorabilia* of Xenophon will be read by the class. The instructor will read to the class the *Apology* of Plato and portions of the *Crito* and *Phædo*. A course of lectures will be given on the earlier Greek philosophy and on the philosophy of Plato.

Those taking the four-hour course will devote one hour a week to the Gospel of John.

Sophomore elective course

Three (or four) hours a week until Christmas

Professor HEWITT

2b *Greek Drama* Until Easter the time will be devoted to Æschylus, Sophocles, and Euripides. The Agamemnon and Iphigenia among the Taurians will be read by the class chiefly from the literary point of view, and special attention will be given to points of similarity and dissimilarity between the ancient and modern drama. The instructor will also read to the class the whole or portions of other plays, among which will be the Prometheus, Antigone, and Alcestis. A course of lectures will be given on the Greek theatre and on the origin and history of the Greek drama.

After Easter two hours a week will be devoted to Greek comedy and to the reading of the Birds of Aristophanes. The instructor will read to the class portions of the Clouds and Frogs. In place of the third exercise each member of the class will be required to do individual work in Greek Syntax or editorial work upon a portion of one of the Greek plays.

Those taking the four-hour course will devote one hour a week to the Acts of the Apostles.

Sophomore elective course

Three (or four) hours a week after Christmas

Professor HEWITT

3a *Homer* A study of Greek Epic poetry and of Greek life in the Homeric times. While some of the books of the Odyssey will be read more rapidly with special attention to the literary qualities, critical interpretation will be given to portions of Homer and of the later Greek Epics. Lectures will be given on the history of Homeric study and on the composition and transmission of the poems. Some study will be devoted to the influence of the poems on later literature.

A portion of the time in this course will be given to the subject of Greek Archaeology with particular reference to the period of the Mycenæan civilization. In place of the third exercise the members of the class may be asked to devote the time to the investigation of some special topic assigned by the instructor.

Senior and Junior elective course

Three hours a week until Christmas

Professor HEWITT

3b *Demosthenes* A study of Greek Oratory The class will read with special reference to their character as masterpieces of argument and expression several of the "parliamentary" speeches of Demosthenes. One or two of the "private orations" or of the speeches of Isaeus may be taken up for the light they shed upon Attic law and social life.

Collateral reading may be assigned in Jebb's Attic Orators and attention will be given to the history of Greece from the close of the Peloponnesian war to the death of Alexander.

In accordance with the plan of making this largely a rhetorical study, the members of the class will from time to time prepare analyses of certain English orations, for comparison with the Greek. The instructor will also present certain comparisons with the oratory of Cicero and that of the French Revolution.

Senior and Junior elective course

Three hours a week from Christmas to Easter

Mr. CLARK

3c *The Greek Bucolic Poets* Selections will be read from Theocritus, Bion, and Moschus, and comparison made with Bucolic poetry in other literatures. Particular attention will be given to the indebtedness of Vergil and certain English poets to the Greek Bucolic poets, and a brief survey given by lectures of the Alexandrian period of poetry.

A portion of the time in this course will be devoted to the continuation of the course in Greek Archæology commenced in the Fall term. The subject in Archæology for the Summer term will be Greek Sculpture and for purposes of illustration use will be made of Heinrich Brunn's Denkmäler and other illustrative material belonging to the Greek Department.

Senior and Junior elective course

Three hours a week after Easter

Professor HEWITT

While course 3 is designed for Juniors and Seniors who have taken Courses 1 and 2, it may, with the consent of the instructor, be open to those who have obtained the grade of A or B in Course 1. While this course is largely a study in literature, history and archæology and so designed to impart a general culture, the course is also intended to be helpful to those intending to teach or to pursue graduate courses in the Ancient Languages.

For a part of the year in place of the third exercise the class will do seminar work under the direction of the instructor.

DEPARTMENT OF LATIN

Professor WILD, Assistant Professor KELLOGG, and Mr. CLARK

1 *Livy, Latin Poets, Tacitus* During the first half-year Book XXI of Livy will be read with reading at sight in Books I and XXII. The principles of Latin syntax will be studied with the aim of connecting the first weeks of college instruction as closely as possible with that received in the preparatory schools. Constant reference will be made to Lane's Latin Grammar in connection with the daily work. The history of Rome during the Punic wars will be an important part of this course, with assignments for collateral reading.

The work for the second half-year will include the reading of selections from Catullus, Horace, Ovid, Tibullus, and Phædrus, with reading at sight of selected Epigrams of Martial, and, after Easter, the *Agricola* of Tacitus with selected portions of the *Germania*. Selected passages from the *Annals* will be read at sight and there will be also collateral reading in the history of the Empire.

The general aim of the course for the year will be, first, to increase the student's working knowledge of the language, and, second, to lead him to an appreciation of Latin literature with some view of the great facts of Roman life associated with it.

Freshman required course

Three hours a week through the year

Professor WILD, Assistant Professor KELLOGG, and Mr. CLARK

2 *Roman Comedy, Horace, Pliny's Letters* The *Menæchmi* of Plautus and the *Adelphæ* of Terence will be read carefully, the *Captivi* of Plautus will be read rapidly and there will be as much reading at sight as possible in other plays of both authors. There will be lectures on the development of Roman Comedy, and attention will be given to the contrasted elements in the work of Plautus and Terence. This course will continue through the first half-year.

The reading work for the second half-year will be divided between the Odes of Horace and the Letters of Pliny. In connection with the Odes of Horace some attention will be paid to the English lyric with the preparation of carefully made translations from the Latin and a comparison of the better known English versions. The course in Pliny's Letters will be a reading course mainly, with constant work at sight and reading of the Latin without translation. During the second half-year a portion of the time will be devoted to a study of Roman customs, partly through lectures and partly through the investigation of separate topics from books of reference and the original sources.

Sophomore elective course

Four hours a week through the year

Professor WILD, Assistant Professor KELLOGG, and Mr. CLARK

3 *Latin Satire, Vergil, Teachers' Course* During the first half-year the general topic will be Latin Satire, with lectures on its origin and development. The reading base will be Juvenal, with rapid and sight reading from Ennius, Lucilius, Varro, Petronius and Apuleius, in Merrill's *Fragments of Roman Satire*. Certain portions of Juvenal will be assigned for individual comment and interpretation with access to the leading editions and translations. The student will present his commentary to the class for general discussion under the direction of the instructor.

The second half-year will involve the study of a single author, Vergil. The aim will be to gain a comprehensive view of Vergil in his life, writings and influence. References to him in classical literature will be carefully studied, books VII-XII of the *Aeneid* will be read and as much as possible of the *Eclogues* and *Georgics*, and the merits of the different editions will be discussed. This course will have in view also the needs of those who intend to teach Latin and will be so arranged that they may have an opportunity of preparing themselves directly for their work. Such students will meet the instructor to discuss the problems of the teaching of Latin in the secondary schools as typified in the teaching of Vergil, and to become acquainted with methods of work and the bibliography of the subject.

Senior and Junior elective course

Three hours a week through the year

Professor WILD

DEPARTMENT OF ENGLISH

Professor SPRING, Professor MAXCY, Mr. PERRY, and Mr. LEWIS

1 *Rhetoric and Composition* The work of the first half-year is devoted to *correctness* of expression, and consists of constant drill in paragraph-themes, sentence construction, and the criticism of common errors. That the course may be practical in application, the class is required to present written work at each recitation; this receives individual attention and is made the basis of class study as illustrative of the principles discussed in the text-book.

The second half-year is devoted to higher phases of composition, particularly the principles of the expository theme. As in the first half-year, the text-book is subordinated to practical exercises in writing which receive individual criticism.

During the first half-year, the work is based on Hill's *Beginnings of Rhetoric and Composition*, and during the second on Baldwin's *College Manual of Rhetoric*.

Freshman required course

Two hours a week through the year

Mr. PERRY and Mr. LEWIS

2 *Advanced Composition* This is a continuation of the second half of English 1, and takes up in detail exposition, narration, and description. These phases of composition are applied in the study of representative writers and in the constant writing of essays, sketches, short stories, etc.

The text-book is Baldwin's *College Manual of Rhetoric*.

Sophomore elective course

Four hours a week during the first half-year

Professor MAXCY

3 *General English Literature* This course is two-fold, embracing not only the historical survey of English Literature from the earliest times to the present day but also a wide course of outside readings so arranged as to accompany the text-book and lectures. Examinations are held on each assignment. In addition to the assigned readings, the course embraces the presentation in class of a wide selection of classic prose and poetic masterpieces. The work is arranged with the view of laying a broad foundation for the English electives taken up later in the course.

The text-book work in general conforms to the matter contained in Moody and Lovett's *History of English Literature* or Simond's *History of English Literature*.

Sophomore elective course

Four hours a week during the second half-year

Professor MAXCY

4a *Junior Essays* Two essays on assigned topics are required each semester from all members of the Junior class. Work is corrected and returned for revision as in English 1 and English 2.

Mr. PERRY

4b *Senior Essays* As in English 4a, but required of the Senior class

Mr. PERRY

5 *Argumentation* This course deals with brief-drawing, the handling of evidence, construction of the forensic, principles of debate, extempore rebuttal, and speaking from brief notes. The first half-year is devoted mainly to fundamental argumentative principles, the analysis and criticism of some extensive forensic, and the con-

struction of personal briefs. During the second half-year the greater part of the time is devoted to practical exercises in argumentative writing and speaking, and to the criticism of class-work.

The course in general conforms to the matter contained in Baker's *Principles of Argumentation*, or MacEwan's *Essentials of Argumentation*, and Alden's *Art of Debate*.

English 5 is open to those who have completed English 2.

Three hours a week through the year

Professor MAXCY

[6 *Study of Anglo-Saxon and Chaucer* The first part of the course will consist of work in Anglo-Saxon grammar, after which selections will be read from Bright's Anglo-Saxon Reader. The remainder of the course will be devoted to the reading of Chaucer's *Canterbury Tales* and *Troilus*, with the special aim of gaining an insight into the political, moral, and social conditions in England during the fourteenth century.

Senior and Junior elective course

Three hours a week through the year

Omitted 1903-1904

Mr. PERRY]

7 *English Prose Fiction* This course covers the history of English fiction from the beginning, and in particular the novel from the time of the great eighteenth century writers to the present day. The study of the history of the novel is supplemented with work on the art of fiction and with extensive readings and analyses of selected specimens. In connection with the course the class uses Perry's *Study of Prose Fiction* and Cross's *Development of the English Novel*.

English 7 is open to all students who have completed English 3.

Three hours a week through the year

Professor MAXCY

8 *The Elizabethan Drama* This course is devoted to the rise of the drama and the critical reading and discussion of plays of Marlowe, Ben Jonson, Beaumont and Fletcher, Webster and of a large group of Shakespeare's most important works.

Senior elective course

Three hours a week through the year

Professor SPRING

9 *English Literature from the Restoration to the close of the Eighteenth Century* Lectures on the progress and interpretation of English Literature during the period Readings and critical essays required

Senior elective course

Three hours a week during the first half-year

Professor SPRING

10 *English Poets of the Nineteenth Century* Lectures biographical and critical, together with assigned readings. This course will include Wordsworth, Coleridge, Byron, Shelley, Keats, Tennyson and other poets of the period.

Senior elective course

Three hours a week during the second half-year

Professor SPRING

11 *English Prose Writers of the Nineteenth Century* A course in which the principal prose writers of this period will be studied. A considerable amount of reading will be assigned.

Senior elective course

Three hours a week during the second half-year

Professor SPRING

12 *American Literature* A study of American Literature, both prose and poetry. Barrett Wendell's *Literary History of America* will be used as a basis for outside reading.

Senior and Junior elective course

Three hours a week during the first half-year

Mr. PERRY

13 *The English Drama from 1642 to 1902* Preliminary lectures will be given upon the structure of the drama. The course will include the reading of representative plays from Wycherly and Congreve to Jones and Pinero.

Senior and Junior elective course

Three hours a week during the second half-year

Mr. PERRY

DEPARTMENT OF ELOCUTION

Mr. LEWIS

The course for Freshmen, covering the first half-year, begins with two lectures on the essentials of good speaking. These are followed by individual drill in declamation, four rehearsals, including delivery before a small division of the class, being required of each student. The choice of speakers for the prize contest in declamation is based on this work.

Freshman required course

First half-year

Sophomores receive training in the delivery of orations of their own production, either written and committed to memory, or carefully prepared from notes. Four rehearsals, including a final speaking before members of the class, are required of each student during

the second half-year, and this work determines the appointments for the preliminary contest in oratory.

Sophomore required course

Second half-year

In the Junior year the delivery of orations is optional, being confined chiefly to those who are candidates for the rhetorical contest. Students who take English 5 are also entitled to rehearsals preparatory to the debates in that elective.

In the Senior year students who are appointed for commencement parts are trained in preparation.

Extended drill is given in all cases to speakers who compete in prize contests. Opportunity for systematic work in the development of the voice and in expression is afforded to members of all classes through concerted exercises given during part of the winter, at hours to be announced. In connection with these exercises, individual instruction is offered to students who desire special work as a preparation for public speaking.

DEPARTMENT OF ROMANCE LANGUAGES

Professor MORTON, Mr. WESTON, Mr. BILLETDOUX, and Mr. NORTHUP

FRENCH

1 *Elementary French* This course includes the study of grammar and composition and the reading of modern French. The class will be arranged in small divisions so that each student may receive individual attention and adequate training in pronunciation and the use of conversational French. In this and in the more advanced courses the French language will be used in the class-room as much as possible, though the character of the work will be essentially literary. Special attention will be given to dictation in each course.

Three hours a week through the year

Mr. WESTON, Mr. BILLETDOUX, and Mr. NORTHUP

2 *Intermediate French* This continues all the work of course 1. Standard authors will be read and the history of French literature given in outline from its origins to the eighteenth century. The use of the spoken language will be increased.

Three hours a week through the year for those in Group I and four hours a week for those in Groups III-V Mr. NORTHUP

[3 *Advanced French* This course is devoted to the poetry and the drama of the nineteenth century, and includes reading, composition, and oral practice. The spoken language will take the place

of English except in translation and occasional lectures. The history of French literature during the nineteenth century, with its origins in the eighteenth, will be studied, especially the history of poetry and the drama.

This course alternates with French 4 and is open to those who have taken French 2 or French 4. Required of Freshmen entering in Group II, elective for Seniors, Juniors, and Sophomores

Four hours a week through the year

Omitted 1903-1904

Professor MORTON]

4 *Advanced French* This course is devoted to the French novel of the nineteenth century and includes reading, composition, and oral practice. The history of French literature during the nineteenth century, with its origins in the eighteenth, will be studied, especially the history of the novel.

This course alternates with French 3 and is open to those who have taken French 2 or French 3. Required of Freshmen entering in Group II, elective for Seniors, Juniors, and Sophomores

Three hours a week through the year Four hours a week for Freshmen in Group II

Mr. WESTON

[5 *Old French Literature* from its origins to the Renaissance Translation of texts into modern French Lectures in French upon the age The course will be essentially literary and illustrative of the social conditions of the time and will be conducted entirely in French. Outside reading will be assigned.

Senior and Junior elective course, alternating with French 6 Open only to those who have taken French 3 or 4 and who are able to follow a course carried on in French

Three hours a week through the year

It is intended that this course shall be given in 1906-1907

Mr. WESTON]

[6 *Classic French Literature* of the age of Louis XIV The course will begin with the Renaissance and show the development of classicism. Lectures in French upon the period The course will be a study of the culture of the age of Louis XIV and the social conditions as expressed in its literature, and will be conducted entirely in French. Outside reading will be assigned.

Senior and Junior elective course, alternating with French 5 Open only to those who have taken French 3 or 4 and who are able to follow a course carried on in French

Three hours a week through the year

It is intended that this course shall be given in 1905-1906

Professor MORTON]

DANTE

[*Dante* Reading of the *Divina Commedia* with the aid of a translation. Enough grammar will be studied to enable the student to follow the Italian text and understand the construction. The course will, however, be devoted to the poem itself, both as a masterpiece of literature and as an exponent of the social, philosophical, and religious ideas of the middle ages.

Senior and Junior elective course alternating with Spanish

Four hours a week through the year

Omitted 1903-1904

Professor MORTON]

SPANISH

Spanish Elementary grammar and reading of classical and modern Spanish. Reading of *Don Quixote* with Ormsby's translation. The object of this course is to give a practical elementary training in Spanish and also to read as much as possible for the sake of a vocabulary. The reading will be in standard works of literature. The history of Spanish literature will be given in outline.

Elective course for Seniors, Juniors, and Sophomores, alternating with the course in Dante

Four hours a week through the year

Mr. BILLETDOUX

THE ITALIAN RENAISSANCE

[(Course formerly known as Romanic Civilization) The course is devoted to the study of the culture of the Renaissance in Italy and its influence upon France and Spain. Manners and ideas of the time chiefly as expressed in its literature. Transformation of medieval ideals. A short time will be given to such study of the art of the period as is needed for comparison and to illustrate the general character of the Renaissance.

Text-book and lectures

Senior and Junior elective

Three hours a week through the year

Omitted 1903-1904

Professor MORTON]

DEPARTMENT OF GERMAN

Professor WAHL, Mr. ELMER, and Dr. KING

1 *Elementary German* This is a course in grammar, composition and reading of narrative prose. Oral use of the language is introduced gradually.

Optional with French 1 for Freshmen in Group I who entered without a modern language. Required of students in Groups II and IV who did not offer German 1 at entrance. Elective for all others.

Three hours a week through the year

Professor WAHL, Mr. ELMER, and Dr. KING

2 *Intermediate German* In this course are read a modern novel; Schiller's Wilhelm Tell; Goethe's Hermann und Dorothea; and Lessing's Minna von Barnhelm. This course includes also grammar and composition. The oral use of the language in the class-room is increased in connection with the texts read, dictations, and lectures.

Required of Freshmen in Group I who passed German 1 and of those students in Group I who took German 1 in college; also of those in Groups II, IV and V. Elective for all others who have taken German 1.

Three hours a week through the year

Professor WAHL, Mr. ELMER, and Dr. KING

3 *Advanced German* This course is devoted to the reading of modern German literature: prose fiction, poetry, essays, lectures, and orations. Oral use of the German language in the class-room will become more extensive. Lectures on the literary, philosophic, historic, social, and political movements, as reflected in the texts read, will finally be given in German, and texts will be assigned for outside reading in this or other departments.

The course is open to all who have had either German 2 or any subsequent course or courses.

Four hours a week through the year

Professor WAHL, Mr. ELMER, and Dr. KING

[4 *Advanced German* This will be a course in reading most recent German literature and will aim also at preparing for the use of German text-books in other departments. It alternates with German 3.

Omitted 1903-1904]

5 *Elective Advanced German* This is a course on Goethe and the classic period of German literature. Faust (Parts I and II), Goethe's autobiography, his poems, Werther, Egmont, Iphigenie and other selections from his works are read and interpreted with reference to the poet's own life and character as well as to the literary, philosophic, and scientific movements to which they are related. The oral use of the language will be constantly increased and lectures will finally be given in German.

The course is open to Seniors and Juniors who have had either German 2 or any subsequent course or courses.

Three hours a week through the year

Professor WAHL

[6 *Elective Advanced German* The purpose of this course will be to prepare for teaching. It is intended to be a course dealing with the historic development of the German language and literature. It will include the reading of illustrative works of various epochs in the history of the German language and literature.

Omitted 1903-1904]

DEPARTMENT OF PHILOSOPHY

Professor RUSSELL

1 *Psychology and the Theory of Thought and Knowledge* James's Psychology and Bowne's Theory of Thought and Knowledge will be used as text-books.

Lectures and collateral reading

Junior and Senior elective course

Three hours a week through the year

Professor RUSSELL

2 *An introduction to Philosophy* Paulsen's Introduction to Philosophy will be used for the first half-year, and selected portions of the Philosophy of Descartes, Locke, and Hume will form the principal study for the second half-year.

Open to Seniors who have taken Philosophy 1

Three hours a week through the year

Professor RUSSELL

3 *Ethics and Philosophy of Religion* Assigned topics for special study and discussion of papers presented by members of the class

Open to Seniors who have taken Philosophy 1

Three hours a week through the year

Professor RUSSELL

DEPARTMENT OF HISTORY

Professor GOODRICH and Professor SMITH

1 *General European and American History*

1a *Medieval History* (378-1500) This course aims to give a survey of the political development of Europe from the Barbarian Invasions of the Roman Empire to the end of the fifteenth century. It is introductory to the courses in European history offered in the

Junior and Senior years. A text-book is used supplemented by lectures and collateral reading. Frequent oral or written tests

Sophomore elective course

Four hours a week during the first half-year

Professor GOODRICH

1b *Modern History* (1500-1763). A continuation of course 1a, covering the history of Europe and North America from the Reformation and the age of discoveries to the beginning of the revolutionary epoch. Methods as in course 1a. Introductory to later courses in American history

Sophomore elective course

Four hours a week during the second half-year

Professor SMITH

2 *History of Art and Civilization* (See Department of the History of Art and Civilization, course 1.)

3 *American History* (1763-1900) This course covers the history of the United States with special reference to parties and politics. Text-book, lectures, parallel reading, written tests

Junior course open to those who have taken course 1b

Three hours a week through the year

Professor SMITH

4 *English History* (449-1689) A course in English political history with special attention to the origin and development of those institutions which were transferred to America. Text-book, lectures, parallel reading, quizzes

Junior course open to those who have taken course 1a or 1b

Three hours a week during the first half-year

Professor SMITH

5 *European History* (1648-1848) The Era of Political Revolution. This course covers in a general way the political development of Europe from the peace of Westphalia (1648) to the Revolution of 1848. Special attention is given to the period of the French Revolution and the Napoleonic Empire. The causes and results, as well as the course of the Revolution, are studied in relation to the principal states of Europe.

Text-books are used, lectures given, and a considerable amount of collateral reading required. The course is intended primarily for Juniors who have completed History 1.

[This year (1903-04) there is, in addition to the regular Junior

section, a section for Seniors, the work of which begins with the French Revolution and extends to the foundation of the new German Empire.]

Three hours a week through the year Professor GOODRICH

[6 *European History* The Era of the Reformation (1500-1648) This is intended to be an advanced course for Seniors involving some study of the original sources of the period. Special attention will be given to the influence of the Reformation on the principal European states, including England. Ability to read French and German easily will be essential.

Omitted 1903-1904 Professor GOODRICH]

7 *American History, Literature and Eloquence* This course studies in detail the history, institutions, social and political conditions of a limited field as illustrated in contemporary literature, speeches and political writings, offering practice in historical criticism and independent investigation. For the year 1903-1904 the period chosen is 1846-1861.

Senior course open to those who have passed creditably in course 3

Three hours a week during the first half-year Professor SMITH

8 *History of Art* (See Department of the History of Art and Civilization, course 2.)

DEPARTMENT OF THE HISTORY OF ART AND CIVILIZATION

Professor RICE

1 *History of Art and Civilization* This course presents a study of the origins of European art and civilization and the most important factors and periods in their development; the records furnished by various forms of art are made use of in lantern-views and photographs to illustrate this subject. It presupposes a knowledge of the main facts of ancient and modern geography and history. Open to those who have completed History 1 and introductory to Art 2. Lectures, text-books and assigned reading

Junior elective course

Three exercises (four hours) a week through the year Professor RICE

2 *History of Art* This course takes up the principles of design in the arts; the evolution of architectural styles; schools of paint-

ing and sculpture; and the civilization of Europe as expressed in architecture and decoration.

This course is fully illustrated by the collections of the art department. Text-books, practice, and assigned topics

Senior and Junior elective course, open to those who have completed or are taking Art I

Three exercises (six hours) a week through the year

Professor RICE

(The numbers in these courses are, for the present, limited to the seating capacity of No. 13 H. H.)

DEPARTMENT OF POLITICAL SCIENCE

Professor NELSON, Professor HEWITT, and Dr. MUNRO

(A) GOVERNMENT

1 *The Structure and Functions of Government in the United States* This course is designed as an introduction to the study of the principles and ideals of civil liberty, and of the successes and failures of the democratic form of government in carrying out the principles and in realizing the ideals. It will be a course in civil government in this country, a study of the structure and workings of our various forms of government, town, municipal, county, state, and national.

A text-book will be used, and there will be occasional lectures, with oral and written tests.

Junior elective course

Three hours a week during the first half-year

Professor NELSON

2 *Modern European Governments* This course is intended to trace the political evolution of the leading states of Europe since 1848 and to present an analytical study of their present political organization. For the current year the constitutions to be studied are those of France, Germany, Italy, and Switzerland together with, if possible, a cursory examination of the constitution of Austro-Hungary.

Lowell's *Governments and Parties in Continental Europe* will be used as the basis of study, supplemented by lectures on the political institutions of the various states under consideration.

Junior elective course

Three hours a week during the second half-year Dr. MUNRO

3 From mid-year to the Easter recess the class will study Greek political ideas. Fowler's *The City State of the Greeks and Romans* will be used as a text-book. The class will also be assigned readings

in Plato's Republic. One hour a week will be used by the instructor in lectures and in giving the theory and a criticism of the Politics of Aristotle.

Professor HEWITT

After the Easter recess the class will take up the study of the application of the principles of civil liberty by the modern democracy. This will be a study of the achievements of democracy, and of the influence of our republic upon the politics of other countries and upon international policies. Lectures, collateral reading, and tests

Junior and Senior elective course

Three hours a week during the second half-year

Professor NELSON

4 *The Evolution of the Principles of Civil Liberty* In this course are studied the gradual development and formulation of the principles of civil liberty from the Norman conquest until the adoption of the constitution of the United States. It includes an examination and comparison of the great Documents of Liberty, *Magna Charta*, the Petition of Right, the *Habeas Corpus* Act, the Bill of Rights, the Act of Settlement, the Declaration of Independence, and the civil liberty articles to be found in the written constitution of the United States. This is a study of the philosophy of democracy as it has controlled the history of the English people and that of the people of the colonies, and the beginnings of our national government.

Instruction will be given by lectures, collateral reading, themes, and discussion. Each student will be required to write a theme or themes on some one of the important phases of the historical and constitutional progression, and each theme will be discussed by the instructor and the class.

Senior elective course

Three hours a week during the first half-year

Professor NELSON

5 *Jurisprudence* This course presents an historical study of the leading legal systems, tracing in outline the growth of Roman Law, Canon Law, and the Common Law of England to the time of Blackstone, together with an analytical study of various important legal institutions. A considerable portion of Blackstone's *Commentaries* (*Chase's Abridged Edition*) will be read and analyzed, while guidance will be given in the study and application of selected cases. Both in its scope and method the aim of the course is to afford a general preparation for the later study of law.

Senior elective course

Three hours a week during the second half-year Dr. MUNRO

(B) ECONOMICS

1 *Elementary Economics* This is an introductory course and is designed to give the student a general view of the field of economic science. Bullock's *Introduction to the Study of Economics* is used as a text-book, supplemented by lectures, discussions, and collateral reading. The course must be taken by those intending to elect Economics 3 or 4.

Junior elective course

Three hours a week during the first half-year Dr. MUNRO

2 *Economic History* The aim of this course is to study the chief topics in the history of agriculture, industry, and commerce with special attention to England and the United States. Cheyney's *Industrial History of England* and Coman's *Industrial History of the United States* are used as texts, supplemented by lectures on selected topics. Special topics are assigned, each half-year, to every student for investigation and report.

Junior and Senior elective course

Three hours a week through the year Dr. MUNRO

3 *Money and Finance* In this course an attempt is made to cover, in a general way, the field of monetary and financial science. The principles of currency and credit, of banking, exchange, and of public finance are studied with special reference to American experience and conditions. Considerable attention is given to the financial history of the United States and to the national banking system.

Senior elective course (Open only to those who have completed Economics 1)

Three hours a week through the year Dr. MUNRO

[4 *Applied Economics* This is an advanced course on the organization of modern industry and on the application of economic principles to the study of present day problems in production, distribution, and exchange. A wide range of assigned reading is made the basis of daily class-room discussion. Each student is given individual instruction in the investigation of assigned topics and in the collaboration and use of statistical data.

Senior elective course (Open only to those who have satisfactorily completed Economics 1)

Three hours a week during the second half-year

Omitted 1903-04

Dr. MUNRO]

DEPARTMENTS OF THE MATHEMATICAL AND NATURAL SCIENCES

DEPARTMENT OF MATHEMATICS

Professor FERRY, Professor MILHAM, Assistant Professor HARDY,
and Mr. SHEPARD

1 *Solid Geometry, Algebra, Plane Trigonometry, and Surveying*

Solid Geometry Books VI, VII, and VIII of Wentworth's New Plane and Solid Geometry, together with original propositions and numerical problems

Algebra Progressions, binomial theorem, logarithms, permutations, combinations, method of undetermined coefficients, determinants, theory of equations, etc. Fisher and Schwatt's Higher Algebra

Plane Trigonometry The trigonometric functions, trigonometric analysis, solutions of right and oblique triangles, etc. Phillips and Strong's Elements of Trigonometry

Field Work in Surveying The practical use of instruments, including determination of heights, simple triangulation, measurement of areas, and levelling

Freshman required course

Four hours a week through the year

Professor FERRY, Professor MILHAM,

Assistant Professor HARDY, and Mr. SHEPARD

2 *Analytic Geometry and Differential Calculus*

Analytic Geometry Plane analytic geometry; the straight line, circle, parabola, ellipse, and hyperbola; with an introduction to analytic geometry of three dimensions Wentworth's Analytic Geometry
Professor FERRY and Mr. SHEPARD

Differential Calculus Beginnings of calculus, methods of differentiation, expansion of functions, indeterminate forms, etc., based on McMahon and Snyder's Differential Calculus

Assistant Professor HARDY

Sophomore elective course, required of Freshmen in admission groups IV and V

Four hours a week through the year

3 *Differential and Integral Calculus*

Applications of differential calculus to plane curves, maxima and minima, etc., based on Osborne's and McMahon and Snyder's Differential Calculus
Professor FERRY

Derivation and application of the fundamental formulas of integration; applications of the integral calculus to the calculation of lengths of curves, areas and volumes, mean values, moments of inertia, etc., based on Murray's Integral Calculus

Assistant Professor HARDY

Junior elective course, open to all who have taken Mathematics 2
Three hours a week through the year

4 *Differential Equations and Modern Analytic Geometry*

4a *Differential Equations*

Methods of solution of the simpler forms of differential equations, applications to many problems of mathematical physics, etc., based on Murray's Differential Equations

Senior elective course, open to all who have taken Mathematics 3
Three hours a week during the second half-year

Assistant Professor HARDY

4b *Modern Methods in Analytic Geometry*

Abridged notation, line co-ordinates, harmonic division, projection, etc., with many applications. Lectures, with references to Salmon's Conic Sections and other works.

Senior elective course, open to all who have taken Mathematics 3
Three hours a week during the second half-year

Professor FERRY

DEPARTMENT OF ASTRONOMY AND METEOROLOGY

Professor MILHAM

Astronomy 1 This course is divided into two parts, Descriptive Astronomy and an introduction to Spherical and Practical Astronomy. In the Descriptive Astronomy a text-book, Young's *Manual of Astronomy*, is used as the basis of instruction. Numerous supplementary lectures are given and the course is illustrated by charts and photographs. Such topics as the time service of the country, the origin of our calendar, the presence of an atmosphere in the case of the moon and the planets, and the nebular hypothesis are treated

at length. During the second part of the course lectures on modern observatories, their location, equipment, and work will be given. Experimental demonstration and practical exercises in the observatory will constitute a large part of the instruction during the last part of the second half-year. A knowledge of Mathematics 1 is required for this course.

Junior and Senior elective course

Three hours a week through the year

Astronomy 2 One of the following half-year courses will be given, the selection being made by the students taking the course.

(a) *History of Astronomy* The rise of Astronomy from the earliest times to the present day will be briefly considered.

(b) *Practical Astronomy* This will consist of spherical Trigonometry, practical exercises in the observatory, and the reduction of the observations. Mathematics 1 and Astronomy 1 are required.

(c) *Theoretical Astronomy* This is an introduction to Celestial Mechanics and is open only to those who have had Mathematics 1, 2, and 3.

(d) *Surveying* Such topics as the theory and use of surveying instruments, land surveying, and determination of heights by triangulation and by means of the barometer will be treated. Mathematics 1 is required.

Junior and Senior elective course

Three hours a week during the second half-year

Meteorology The equipment of the stations of the United States Weather Bureau and scientific weather prediction are very fully treated. The text-book, Davis's *Elementary Meteorology*, is supplemented by numerous lectures and practical work on meteorological statistics and in making weather forecasts.

Junior and Senior elective course

Three hours a week during the first half-year

DEPARTMENT OF CHEMISTRY

Professor MEARS and Mr. MEARS

Chemistry 1 General Chemistry The principles of chemistry are studied in connection with the non-metals and their compounds. This course is given by experimental lectures, supplemented by recitations and practical work in the laboratory. A printed outline of the lectures is used, to be enlarged by notes taken in the class-room.

Sophomore elective course

Four hours a week during the first half-year

Chemistry 2 Metallic Chemistry and Qualitative Analysis A course of lectures is given on the occurrence, properties, and uses of the metals and their compounds.

Most of the time is devoted to qualitative analysis in the laboratory. This work includes the reactions of the principal bases and acids, their detection and separation. Substances are examined in both wet and dry way. About 100 solutions and 100 solid substances are analyzed during the course, including about 50 minerals.

Five periods a week of two hours each, or their equivalent, during the second half-year. This course is a continuation of Chemistry 1 and is open to those who have completed that course.

Chemistry 3a Quantitative Analysis This course embraces the quantitative determination and separation of the principal bases and acids. Both gravimetric and volumetric methods are employed.

Year course in connection with Chemistry 3b

Three periods a week during the first half-year

Chemistry 3b Organic Chemistry Lectures on the compounds of carbon, including the history of chemistry and its development to the present time

Open to those who have completed Chemistry 2

Three periods a week during the second half-year

Chemistry 4 This course includes the preparation of both inorganic and organic compounds, the study of chemical theories, and work in physical chemistry in the laboratory.

Open to those who have completed Chemistry 3

Three periods a week through the year

DEPARTMENT OF PHYSICS

Assistant Professor McELFRESH

1 *General Physics* This course deals with the elementary facts and principles of physics and with the application of physical laws to the experiences and phenomena of daily life. The instruction includes lectures with experimental demonstrations, written recitations, and work in the laboratory.

Sophomore elective course

Four hours a week during the first half-year

2 Experimental Physics Mechanics, Sound, Heat, Light, Magnetism, and Electricity This course consists of a series of physical measurements in the laboratory, accompanied by lectures. The lectures deal with the methods and principles involved in the laboratory work and also discuss certain physical problems which do not readily lend themselves to laboratory experimentation. In the laboratory work high-grade instruments of precision are employed and the course is expected not only to develop familiarity with physical phenomena but, at the same time, to give skill in accurate measurement.

Open to those who have taken Physics I

Five exercises a week during the second half-year These will generally be two lectures of one hour each and three laboratory periods of two hours each.

3 (1) Electrical Measurements and Practical Applications of Electricity This course consists of lectures and laboratory work and includes a study of the magnetic properties of iron and steel, of direct and alternating current phenomena, and of their practical illustration in the dynamo and motor.

(2) Heat and Light A study of the elements of Thermodynamics and Physical Optics Lectures and reading with occasional laboratory experimentation

Only one of these sub-courses will be given each year

Three exercises a week through the year

DEPARTMENT OF BIOLOGY

Professor CLARKE, Professor KELLOGG, and Mr. WOODRUFF

1 The fundamental facts and principles of the science of life are presented in this course. It treats of the order of nature and of the laws of nature. It gives the student a knowledge of the properties and powers, and what contributes to the successful action of, the living material of which he is composed, and through which he does his life work. It deals with the structure of living matter, its possible origin, and its relation to non-living matter.

A typical plant and animal are studied to illustrate the way in which the two great groups solve the problem of maintaining life, their relations to each other and to their surroundings. As the highest form of living matter, man is studied in his relations to, and

his dependence on, other forms of life, and with regard to the meaning and origin of his structure. An outline is given of the evidences of the evolution of life, of mutual aid and associated life among animals, and their possible significance. The object of the course is to make a man intelligent regarding himself, and his fundamental relations to his environment; to set before him the relations of this knowledge to other knowledge, and by this broad view gain a larger appreciation of, and a more generous sympathy with, many of the great interests and resources of human life.

While this course is complete in itself it furnishes a broad foundation of value to one who takes further work in biology.

Lectures, with the examination of note-books, and a small amount of laboratory work

Sophomore elective course

Four hours a week during the second half-year

Professor CLARKE

2 The year's work includes three subjects.

(a) *Zoölogy of the Invertebrata* This part of the course extends from September to about the last of February. Instruction is by means of lectures, recitations, and laboratory work. After considering the fundamental properties of protoplasm, the cell as the structural and physiological unit, the relations existing between animals and plants, and other preliminary subjects, the great groups of animal forms below the vertebrates are examined in order from the simpler to the more complex. The general characters of each group are studied in some detail. Explanations of general questions involved in the comparison of various animals are given throughout the course. From each group several species are selected for minute study in the laboratory.

(b) *Histology* After completing (a) about five weeks are given to the study of the minute structure of animal tissues. The work includes a description of methods of killing, staining, sectioning, and mounting of tissues, and is conducted by means of lectures, recitations, and laboratory work.

(c) *Theories of Biology* The remainder of the year is given to a series of lectures, with recitations, on the general problems of biology.

The aim of the course is to show the significance of the varied phenomena of the living world, to give a definite knowledge of the

scientific method of dealing with facts, to afford a practical drill in the inductive process of reasoning, and, so far as possible, to stimulate a habit of independent thought.

It considers the views of the early Transmutationists, of Lamarck and the Neo-Lamarckians, and enters fully into a discussion of the theory of natural selection of Darwin and Wallace, on which the science of biology is largely founded. Attention is given to the earlier criticisms of the theory, and more particularly to recent observations which tend to limit it as a universal explanation of the structural and functional peculiarities of organisms.

Among the subjects discussed are the meaning of the term species, the multiplication of organisms and the struggle for existence, variation among individuals, the meaning of color and peculiar structural modifications among animals and plants, heredity, natural selection and the development of the mental faculties, natural selection and morals, and the influence of the scientific method on modern thought.

Junior and Senior elective course

Three exercises (six hours) a week through the year

Professor KELLOGG

3 A continuation of Biology 2

(a) *Zoölogy of the Chordata*

The course continues through the first half-year. As in the *Zoölogy of the Invertebrata*, instruction is by means of lectures, recitations, and laboratory work. The fishes, amphibia, reptiles, birds, and mammals are studied comparatively by means of dissections in the laboratory.

(b) *Embryology* The second half-year is given to a study of the development of the starfish, frog, chick, and mammal. In the first two forms, special attention is given to the early stages which follow fertilization. The work on the chick is outlined by a text-book, and is followed in the laboratory by means of preparations made by the student. It covers the development from the beginning of incubation to a stage in which the more important organs of the body have appeared. Mammalian development is compared with that of the chick, which it closely resembles, but is studied in the laboratory only by means of models and demonstration preparations.

Senior elective course

Three exercises (six hours) a week through the year

Professor KELLOGG

**DEPARTMENT OF HYGIENE, ANATOMY, AND
PHYSIOLOGY**

Dr. HOWARD

Hygiene A series of twelve lectures on subjects pertaining to personal and public health

Freshman required course

After Easter

Anatomy and Physiology The aim of the course is to give the student a general view of physiology with sufficient anatomy and histology to make the subject intelligible. The facts and theories of human physiology receive most attention, but the functional relations of the human body to lower forms of life are also discussed. The physiological laboratory has facilities for exhibiting many vital phenomena. The physiology of muscle and nerve is studied in detail in the isolated muscle and nerve of the frog. The course, together with the courses in Biology, prepares the student to enter intelligently upon medical study.

Junior and Senior elective course

Three hours a week through the year

DEPARTMENT OF GEOLOGY AND BOTANY

Dr. CLELAND

1 *General Geology* This course is designed to give the student a general knowledge of the formation, structure, and history of our globe. The purpose throughout the study is to so familiarize the student with the features of the earth's surface by lantern slides, excursions, photographs, models, and lectures that the earth forms will have a definite meaning to him. In the study of the life of the past the course of the evolution of animals and plants will be carefully traced.

The subject is divided into three parts:

(a) *Dynamical Geology* deals with the forces which have shaped, and are now shaping, the earth's surface, such as volcanoes, earthquakes, glaciers, and rivers.

(b) *Structural Geology* In this part the form of the earth's surface, the structure of the earth's crust, and the rocks of which it is composed will be studied.

(c) *Historical Geology* This division of the subject is a history of the life of the earth as shown by the fossil remains found

embedded in the rocks and is primarily a study of the development of life. The fossils in the collection and a number of casts of extinct vertebrates purchased this year will be used in illustration.

Excursions will be taken to points of geologic interest about Williamstown. It is possible that two excursions outside of Williamstown will also be taken.

Open to Juniors and Seniors who have had Chemistry 1

Three hours a week through the year

2 Mineralogy The purpose of this course is to give (1) a knowledge of the commoner minerals, and (2) a knowledge of building stones and other rocks (lithology). To accomplish this the subject will be introduced by a brief course in crystallography followed by blow-pipe analysis. The student will be taught to identify the minerals by their physical properties as well as by blow-pipe and chemical tests. Specimens will be freely used. The text-book will be *Determinative Mineralogy and Blow-pipe Analysis*, Brush-Penfield.

Laboratory fee \$3.00

Open to students who have had either Geology 1 or Chemistry 1 and 2

Three exercises (six hours) a week during the first half-year

3 Advanced Geology The second half-year has been planned to supplement the work of Geology 1. During this period each student will prepare one or more papers on subjects to be assigned by the instructor. These subjects will, in most cases, require considerable field work.

Open to students who have had Geology 1

Three hours a week during the second half-year

Botany This course will consist of a study of plant physiology and morphology. The aim is to give the student a general knowledge of the whole field. During the autumn the physiology of plants, which will include such topics as the absorption and movements of liquids, food manufacture, and the phenomena of growth and movement, will be studied. Then will follow a careful study of plant morphology, beginning with the simplest forms of the algæ and working up to the flowering plants. Especial emphasis will be placed on the evolution of sex. In the spring some time will be spent in the analysis of flowering plants and ferns. Atkinson's

Elementary Botany will be used as a basis with Campbell, Sachs, and others as references.

Laboratory fee \$5.00

Open to Juniors and Seniors

Three exercises (six hours) a week through the year

DEPARTMENT OF PHYSICAL TRAINING

Mr. SEELEY

Exercises consisting of marching, calisthenics, and light gymnastics with wands, clubs, chest-weights, and dumb-bells

Freshman required course

Three forty-five minute periods a week until Easter

Elective work in the gymnasium is offered to the other classes.

[In connection with this work a course of lectures on Hygiene will be given after Easter by Dr. Howard. See the announcement of Hygiene, Anatomy, and Physiology.]

THE GROUP SYSTEM

The fundamental principle of the curriculum is that of the Group System, which comes into operation at the close of Freshman year. This Group System presents the following features:—

There are three groups, I Languages, II Philosophy (including Government, History, and Political Science), and III Sciences (including Mathematics).

After Freshman year and under the operation of the Group System all studies are elective.

Although no specific studies are required after Freshman year, every student must have completed after that time and before graduation at least 12 semester-hours* in each of the three groups.

Every student must have completed, after Freshman year and before graduation, a major study. By a major study

* [NOTE—A semester-hour, or half-year hour, is one hour a week continued for a half-year. A year-hour is one hour a week continued for a year. Twelve semester-hours are therefore equivalent to four three-hour-a-week courses pursued for a half-year, or to two three-hour-a-week courses pursued for a year.]

is meant a special, cumulative study of fundamental and advanced courses, amounting to at least 15 semester-hours in some one of the following subjects:—

1 Greek; 2 Latin; 3 English; 4 French; 5 German; 6 Philosophy; 7 History; 8 Economics; 9 Economics and Government; 10 Mathematics; 11 Chemistry; 12 Physics; 13 Biology; 14 Chemistry and Geology.

Elementary French or Elementary German must either be presented at entrance in addition to the entrance subjects hitherto required, or else taken as an extra course after entrance. The number of hours required for a degree will be 59 for those fulfilling this requirement at entrance and 62 as heretofore for those who take the course in college. A second year is required of the language presented at entrance or begun in Freshman year.

At least 32 semester-hours of Sophomore work (the equivalent of four four-hour year courses) must be taken before graduation.

The number of semester-hours required for graduation is 118 (59 year-hours); or 124 (62 year-hours) for those who do not present one year of a modern language at entrance in addition to the subjects previously required. Students in the course with Greek must have completed after Freshman year and before graduation at least 6 semester-hours of Greek or Latin.

Every student, in order to graduate, must have attained a grade above that of D in at least one-half the number of hours required for graduation.

EXHIBIT OF STUDIES

The following exhibit of studies indicates the courses of instruction that are offered to each class. The studies of the Freshman year are prescribed, except that there is an option between French and German for students in Group I. Students in Groups II and IV must have completed before graduation the work covered by Courses 1, 2, and 3 or 4, in French, and Courses 1 and 2 in German; those in Groups III and V must have completed before graduation the work covered by Courses 1 and 2 in French, and Courses 1, 2, and 3, 4, or 5 in German; those in Group I must have completed the second year's work in one of these languages. The groups are arranged according to the different conditions of admission stated on page 25. The unenclosed figures refer to the courses of instruction as announced by the departments in the catalogue, and the figures in parentheses indicate the number of exercises a week in each course.

FRESHMAN YEAR—REQUIRED COURSES

| Training | Training | Training | Training | Training |

NOTE.—Freshmen in Group I who offer neither French nor German at entrance will take one of these courses instead of French 2 or German 2. Similarly, those in Groups II or IV who do not offer German at entrance will take that course instead of German 2; and those in Groups III or V who do not offer French at entrance will take that course instead of French 2.

SOPHOMORE YEAR

Courses amounting to at least 32 semester-hours must be taken before graduation from the following:

YEAR COURSES

| | |
|-------------------------------------|----------|
| French 1 | (3) |

GENERAL INFORMATION

LIBRARY

The College Library contains fifty thousand five hundred volumes, exclusive of duplicates, and over seventeen thousand eight hundred pamphlets. The card catalogue now covers this entire collection, bound and unbound. For the maintenance and enlargement of the library about four thousand five hundred dollars are expended annually. The Lawrence, Jonathan Phillips, Adriance, Jones, Class of 1878, and Josiah William Wheeler funds represent a capital sum of about fifty-three thousand one hundred dollars, the income from which is increased by gifts, and by special appropriations of the Trustees.

Students have direct access to all books. They may draw three volumes at a time, to be retained, if desired, for two weeks, with the privilege of one renewal. Abundant facilities are afforded for reading, study, and writing during library hours.

The library is open every week day during the entire year. In term time the hours are from 8.30 A. M. to 12.30 P. M., from 2 P. M. to 6 P. M., and, for the east wing only, from 7.30 P. M., to 9.30 P. M. On Sundays during the college year the library is open, for reading and reference only, from 2 P. M. to 5.25 P. M. In vacation the hours are from 10.30 A. M. to 12.30 P. M., on week days.

A special effort is made to promote the seminary method. For this purpose reference books bearing on the term's work are placed in a special department of the east wing. Branch libraries are established in the Thompson Laboratories, bringing the books bearing on biology, chemistry, physics, and mathematics within the immediate reach of students in those departments. With the same method in view, books used for special study in language, history, or philosophy are

placed in rooms of the library or other college buildings reserved for this purpose.

The libraries of the Philotechnian and Philologian Societies, containing nine thousand volumes, are open to their members Wednesdays and Saturdays.

A comfortable reading-room, well supplied with daily and weekly papers and other current literature, is maintained under the auspices of the Mills Young Men's Christian Association.

LABORATORIES

The departments of Biology, Chemistry, and Physics are located in the three buildings presented to the College by the late F. F. Thompson, Esq., of New York City.

The Biological Laboratory contains three laboratories for the various courses offered, a general lecture room, a library and reading-room where much of the current literature of biology is kept on file, also a room for illustrative collections, and an aquarium. The work of instruction and research commands the aid of suitable apparatus, such as microscopes, microtomes, ovens, baths, and other necessary appliances, together with a large series of charts, models, and illustrative collections, which are being continually increased. There is also a complete stereopticon outfit, with projection microscope and arc light.

The Chemical Laboratory is supplied with the best modern appliances for instruction in chemistry. The building contains three large laboratories, two private laboratories, lecture and recitation rooms and a reference library.

The Physical Laboratory contains a well appointed lecture room, a recitation room, separate laboratories for the work of the different classes, a department library, and rooms especially arranged for advanced work in electricity, magnetism, light, and chemical physics. Power is furnished by a Westinghouse engine of fifteen horse-power, and the electrical equipment includes a five kilowatt dynamo, experi-

mental dynamos and motors, Weston measuring instruments, galvanometers, standard cells, condensers, and resistances. A storage battery of thirty cells furnishes current for the electric lights used in the lecture room and laboratories. A workshop in the basement contains an additional engine, a water motor, a 13" lathe, a grinder, and other tools for working in metal and wood.

OBSERVATORIES

The astronomical department of the college possesses two observatories for illustration and scientific investigation. The older was built by Professor Albert Hopkins in 1838, and contains an equatorial by Phelps of Troy, N. Y., with an object glass by Alvan Clark, Senior, which has an aperture of 7 inches. This instrument was constructed about 1852 and is interesting as an early example of Clark's optical work. It is employed for instruction and the observation of occasional phenomena. The meridian room of the Hopkins Observatory contains a portable transit which can be used as a zenith telescope, together with the necessary clock. Another room contains the meteorological apparatus. Meteorological observations have been made regularly since about 1816.

In another part of the town a plot, comprising five acres and a half, was purchased in 1881 for astronomical purposes. At present this enclosure contains the Field Memorial Observatory, an iron meridian house, built at the expense of the Hon. David Dudley Field, together with a small building for the accommodation of portable instruments. The main instrument of this observatory is a fine meridian circle by A. Repsold and Sons of Hamburg, with a telescope of $4\frac{8}{10}$ inches aperture and a circle divided to 2' of arc, reading by four microscopes to single seconds directly. The meridian circle is provided with a Riefler clock, a fillet chronograph, and collimators according to Rittenhouse. In addition, the department of Astronomy is provided with a

large number of portable instruments, among which are two telescopes for the simpler observations and three surveyor's transits, one of them a Wanschaff universal with seven-inch limb, latitude level, and microscopes reading to 5" directly. There are also several instruments of reflection, including sextants, sailors' octants, and two prismatic circles, three chronometers, artificial horizons, and other small pieces of apparatus.

CLASSICAL SOCIETY

The Classical Society, formed of instructors and students in the elective Latin and Greek courses, has for its object the increase of interest in the study of the classics. It holds its regular meetings in the College Library on the second Tuesday evening of each month, for the reading and discussion of original papers and for reports in the fields of Greek and Latin philology and archæology.

LYCEUM OF NATURAL HISTORY

This organization was founded in 1835, and is maintained by the students of the college in connection with the department of Biology. Regular meetings are held, at which reports are presented by the members or by visiting biologists.

A fund established by the late William J. Walker equips expeditions, organized for the purpose of making collections and of study, at more or less distant points. This fund, which, by the terms of the gift, is awarded every fourth year, will be next available in the summer of 1905, for the encouragement of biological research at the Marine Biological Laboratory, Woods Holl, Mass.

The Lyceum of Natural History was provided with a building, Jackson Hall, named in honor of its donor, the late Nathan Jackson, in which a museum is located, which contains scientific material collected by former expeditions,

together with ethnological material sent to the college by its missionary graduates, and various collections belonging to the college.

ART ASSOCIATION

The Williams Art Association, an organization of the students, under the direction of Professor Rice, provides occasional lectures and exhibitions during the autumn and winter terms. The material has been provided largely by gifts of alumni and friends, who show their interest in this feature of college life by contributions to the support of the courses in the history of art. Room No. 13 in the Hopkins Memorial Building has been fitted up for exhibiting and storing the photographs, prints, and other illustrations purchased since the founding of the association.

ART COLLECTION

A valuable collection of paintings, bas-reliefs, Etruscan vases, and Peruvian pottery, the gift of the late Mrs. John W. Field, of Philadelphia, is on exhibition in the Library.

The gift of suitable works of art is solicited by the Trustees of the college, subject to approval by a committee of their number.

MUSEUM

Clark Hall and the Wilder Mineralogical Cabinet were provided through the generosity of the late Edward Clark of the class of 1831. Besides this cabinet the museum contains the collection of the late Professor Emmons and many specimens obtained by donation, exchange, and purchase.

The collection of fossils is arranged stratigraphically on the first floor and biologically on the second floor. Invertebrate fossils are well represented. During the past two years the value of the collection, from a teaching standpoint, has been greatly augmented by the purchase of a number of

casts of fossil vertebrates, among which is a series of casts of horses' and camels' feet and heads, showing the progress of evolution in these families, skulls of Dinoceras and Smilodon, and models of other vertebrates.

The general geological collection contains a great deal of exceptionally fine material illustrating structural geology. A number of models illustrating the form and structure of the earth have been purchased during the past two years and are now on exhibition. A geological relief map and a geological model of the Greylock region have recently been added to the collection.

Clark Hall is open to students and to the public every week day throughout the year.

GYMNASIUM

The Lasell Gymnasium, erected and equipped at a cost of \$50,000, chiefly by the munificence of the widow of the Hon. Josiah Lasell, of the class of 1844, and of his son, Josiah Manning Lasell, of the class of 1886, furnishes abundant facilities for physical development. The apparatus is the outcome of the study and invention of the best teachers of gymnastics. Pulley-weights of the best pattern, adjustable to varying strength, light Indian clubs, dumb bells, both of wood and of iron, horizontal and parallel bars, rings, and apparatus for developing special muscles, are used under the immediate supervision of an instructor. An inclined padded running track 229 feet in length, baseball cage, and bowling alleys are important features of the building. It is provided with hot and cold water, tub, sponge, and shower baths, and four hundred lockers. There are several class drills daily in the main hall at hours suiting the convenience of the students. A careful examination and measurement of each student is made by the Director, not only soon after entering college, but also at occasional intervals later in the course, in order that the exercise may be

adapted to individual peculiarities, and a symmetrical development secured. Gymnastic exercise is required of the Freshman class until the Easter recess.

FIELD SPORTS

The smaller athletic fields near the college buildings afford practice in lawn-tennis and baseball, while the large Weston Field, the gift of the late Hon. Byron Weston, of Dalton, affords opportunity for baseball, football, and track athletics. The golf links of the Taconic Club is open, upon moderate terms, to student players.

COLLEGE INFIRMARY

Through the generosity of friends of the college a house has been provided where students who are ill can receive proper attention. In cases of severe sickness trained nurses may be secured at the expense of the patient. Each student received into the infirmary pays one dollar a day for his own board and the same for that of his nurse. Board bills are to be paid to the College Treasurer. Students are assessed three dollars a year for the maintenance of the infirmary.

THOMPSON COURSE OF ENTERTAINMENTS

This course, which for many years was sustained by the liberality of the late F. F. Thompson, Esq., of New York City, provided lectures, concerts, and other entertainments during the winter. Mrs. Thompson has generously offered to continue the course for the current year.

Last year entertainments were given by Charles Battell Loomis, Herbert W. Gleason, Lotus Glee Club, Leland T. Powers, Adamowski Quartette, Polk Miller, and Lyman Underwood.

THE BEACH-HYDE LECTURE

James H. Hyde, Esq., of the Equitable Life Assurance Society, New York City, has generously provided that the annual lecturer of the Cercle Français de l'université, Harvard, shall give one lecture before the Faculty and students of the college in honor of his great-grandfather, James Beach, of the class of 1804.

ORDER AND DISCIPLINE

It is the aim of the college to develop in the individual student the sense of personal responsibility for good order and a high standard of scholarship, and to secure, in the largest measure, his coöperation with the Faculty in the development of his own character. But if such coöperation is plainly impossible, a student may be dismissed from college even without previous warning.

HONOR SYSTEM

All examinations are conducted under an honor system, established in 1896, by which the presence of proctors in the examination room is dispensed with and each student is placed upon his honor. The following declaration is necessary to make an examination valid: *I have neither given nor received aid in this examination.*

All cases of suspected fraud are dealt with by a committee of ten students, including representatives from each class, who have the power to decide on the question of guilt and to recommend to the Faculty the penalty of dismissal from college in the case of a Senior, Junior, or Sophomore, and of suspension in the case of a Freshman.

REGISTRATION

All students are required to register at the Dean's Office on the Monday, Tuesday, and Wednesday preceding the beginning of the college year.

ATTENDANCE ON COLLEGE EXERCISES

Attendance upon nine-tenths of all college exercises is required, and if a student fail for any cause to meet this requirement of attendance upon secular exercises, work additional to that done by the class will be assigned in some department or departments of study in which the failure has occurred. This assignment of extra work will be made by a committee of the Faculty in consultation with the instructor, and will be announced at the end of the half-year.

The regulation of attendance upon both the secular and religious exercises is entrusted to the Dean. He is authorized to establish such rules for attendance upon the religious exercises of the college as he may deem necessary, and to place on probation any student who fails to meet these requirements, or whose attendance on recitations and lectures is especially irregular. If a student does not comply with the conditions of the probation, the Dean may dismiss him from college; but any student thus dismissed has the right of an appeal through the Dean to the Committee on Administration.

COMPLETION OF COURSES

A course will be considered satisfactorily completed for any half-year when the student has obtained a mark of not less than fifty in the term work (which shall include all oral and written exercises prior to the semi-annual examination), and also a mark of not less than fifty in the semi-annual examination. A student failing to obtain a mark of fifty in the term work must repeat the course with a subsequent class or take, in the case of an elective, an equivalent course. A student failing to obtain a mark of fifty in the semi-annual examination will be allowed two further opportunities to pass that examination; if unsuccessful in both of these, he will be required to repeat the course with a subsequent class or take, in the case of an elective, an equivalent course.

DEGREES

Bachelor of Arts—The degree of Bachelor of Arts is conferred by vote of the Trustees at the annual Commencement upon students who have completed the requirements as to courses to the satisfaction of the Faculty, have paid their dues to the Treasurer, and have returned all books belonging to the library; but the degree may be forfeited by misconduct at any time previous to the close of the Commencement exercises.

Master of Arts—The degree of Master of Arts will be conferred upon graduates of this college, or of any college which grants the Bachelor's degree under similar or equivalent conditions, who have spent one year in residence at this college pursuing two approved courses of study in different departments, the total work being equal to that of a college year, and who have passed satisfactory examinations on both subjects and have prepared a satisfactory thesis.

The degree will be conferred upon graduates of this college, who have spent one year in residence at any academic or scientific institution engaged in non-professional study, and who, having been registered at this college as candidates for the degree not less than a college year, have fulfilled the conditions regarding courses of study, examination, and thesis specified in the preceding paragraph.

The degree will be conferred upon graduates of this college who, not having been in residence, but having been registered at this college as candidates for the degree not less than two years, have fulfilled the conditions with regard to courses of study, examinations, and thesis specified in the first paragraph.

Each candidate for this degree must register his name, address, and course of study with Professor Maxcy, secretary of the committee on graduate students, not later than the fifteenth of October of the year for which he desires registration. Blank forms for registration may be obtained upon application. This registration must be renewed each

year for which the applicant desires to be considered a candidate. A registration fee of ten dollars must be paid at the time of the first registration.

Each candidate must submit two courses of study, not in the same department. These courses must meet the approval of the professors to whose departments they are related, and of the Faculty committee on graduate students (consisting for the present year of Professors Hewitt and Maxcy). Of these courses one, to be known as the major course, must be equivalent to at least two-thirds of the work of a college year, and the other, to be known as the minor course, must be equivalent to at least one-third of the work of a college year.

The thesis required of each candidate must treat a subject related to the major course of study. It must be submitted not later than the fifteenth of May of the year in which the candidate desires to be examined, and must meet the approval of the professor to whose department it is related and of the Faculty committee on graduate students. A copy of the thesis, printed or typewritten on paper of the size usually used in a typewriter, must be deposited in the college library.

In addition to the registration fee, a charge of fifteen dollars will be made for the examinations. It must be paid at the time the examinations are taken. No further charge is made for the diploma.

Candidates in residence who desire instruction will be charged forty dollars for each course, in addition to the prescribed fees for registration and examination. This will entitle them to one weekly period of instruction in each course. An additional charge may be made for the use of laboratory apparatus.

Successful candidates for the degrees are expected to be present at the time the degrees are conferred unless previously excused by the President.

RECORDS AND REPORTS

A report of scholarship and conduct is sent to every student's parents or guardian at the close of each half-year, and at such other times as the Faculty may deem expedient. A permanent record is kept of each student's scholarship and by this record his final rank is determined.

PUBLIC WORSHIP

Chapel Exercises are held every week-day morning and Sunday evening, and all students are required to be present.

On every Sunday morning, also, there is held in the college chapel a service at which the presence of all students not excused to attend elsewhere is required.

The preachers for the year, besides the President, Professors Russell and Spring, and Dr. Bascom, have been as follows in the order mentioned:

Rev. W. S. Butler, Williamstown, Mass.; Professor Frank K. Sanders, New Haven, Conn.; Rev. Edward Everett Hale, D.D., Roxbury, Mass.; Rev. Raymond Calkins, Pittsfield, Mass.; President Henry C. King, D.D., Oberlin, O.; Rev. Willard Scott, D.D., Worcester, Mass.; Rev. F. B. Savage, Newburgh, N. Y.; Rev. H. Grant Person, Seneca Falls, N. Y.; Rev. William R. Richards, D.D., New York City; Rev. E. T. Tomlinson, D.D., Elizabeth, N. J.; Mr. Robert E. Speer, New York City; Rev. T. P. Frost, D.D., Newark, N. J.; Rev. John Balcom Shaw, D.D., New York City; Rev. Andrew Gillies, Troy, N. Y.; President Wm. J. Tucker, D.D., Hanover, N. H.; Rev. H. P. Dewey, D.D., Brooklyn, N. Y.; Rev. E. Winchester Donald, D.D., Boston, Mass.; Rev. C. E. Jefferson, D.D., New York City; Rev. C. L. Thompson, D.D., New York City; Rev. J. S. Zelie, Plainfield, N. J.; Rev. Shephard Knapp, New York City; Rev. Wm. W. Ranney, Hartford, Conn.; Rev. D. J. McMullan, D.D., New York City; Rev. Nehemiah Boynton, D.D., Detroit, Mich.; Mr. Luther D. Wishard, New York City; Rev. E. E. Braithwaite, No. Cambridge, Mass.; Prof.

Henry G. Smith, Cincinnati, O.; Prof. Arthur Gillett, Hartford, Conn.; Rev. Wm. V. W. Davis, D.D., Pittsfield, Mass.; Rev. John H. Denison, Boston, Mass.

PRIZES

BENEDICT PRIZES

The late Hon. Erastus C. Benedict, of the class of 1821, once an instructor in the college, established seven first prizes of twenty-five dollars each, which may be awarded annually for excellence in the following departments: Latin, Greek, French, German, Mathematics, Natural History, and History; seven second prizes of fifteen dollars each, which may be awarded in the same departments.

He also founded a prize of twenty-five dollars, to be given annually to that member of the college who, at the close of each college year, shall be found to have received the largest number of prizes.* Honorable mention is here counted as a prize. In case of a tie, the relative grades of the prizes will be taken into account, and honorable mention in Latin or Greek and a Rice book prize will not both be counted.

VAN VECHTEN PRIZE

A prize amounting to seventy dollars, established by A. V. W. Van Vechten, Esq., of the class of 1847, may be awarded for extemporaneous speaking. The assignment of this prize will be made by a committee of the Faculty on the basis of a public competition.

GRAVES PRIZES

The late Arthur B. Graves, Esq., of the class of 1858, founded seven prizes, amounting to two hundred dollars, which may be awarded as follows: Six prizes of twenty dollars each for the best six essays prepared by members

*For the present an additional sum of \$75.00 will be given each year by a friend of the college to increase this prize to \$100.00.

of the Senior class, on subjects assigned by the Faculty; and one prize of eighty dollars to the student who shall deliver his essay in the most effective manner before a public audience. The essays are deposited in the library.

RHETORICAL PRIZES

On the evening before Commencement, ten speakers, appointed equally from the Junior and Sophomore classes, deliver original orations in competition for five prizes. The income of two thousand dollars, a part of which was given by Elizur Smith, Esq., of Lee, is appropriated for these prizes.

The Trustees of the college offer two prizes of twenty dollars and ten dollars respectively to members of the Freshman class for excellence in declamation.

RICE PRIZES

The income of five thousand dollars, left to the college by the late James Lathrop Rice, Esq., is by his will appropriated to the encouragement of Latin and Greek scholarship. Of this income sixty dollars may be awarded at Commencement of each year to that member of the Senior class who shall have shown the fullest and most accurate knowledge of certain Latin classics; and forty dollars to the member of the same class who shall have attained the second rank in the knowledge of the same authors; sixty dollars may be awarded at the same time to the member of the Senior class who shall have shown the fullest and most accurate knowledge of certain Greek classics; and forty dollars to the member of that class who shall have attained the second rank in the knowledge of the authors in question. The same student may compete for the prizes in both departments, but no prize will be assigned to a student who has not pursued the subject as an elective during both the Junior and Senior years.

DEWEY PRIZE

The late Hon. Francis Henshaw Dewey founded a prize of fifty dollars to be awarded to the member of the graduating class who presents the most creditable oration in point of composition and delivery at Commencement exercises.

LATHERS GOLD MEDAL

The income of a fund of one thousand dollars, received from the late Col. Richard Lathers, is to be used each year for the making of the Lathers gold medal from a mould or die, for the manufacture of which Colonel Lathers gave an additional sum of one hundred dollars. This medal will be offered in competition to all members of the Senior class who hand to the Secretary of the Faculty on or before the first day of March preceding their graduation, a written essay of not less than one thousand words on "The Duties of Christian Men in Relation to Government," and will be assigned to that writer whose essay has been pronounced by a committee of the Faculty to be the most worthy of publication. The essay selected shall then be sent by the Secretary of the Faculty to the *Springfield Republican*, or to a journal published in Pittsfield, with the request that it may appear in a near issue of such newspaper. In case no one of the competing essays has been adjudged worthy of publication, no medal for that year shall be awarded.

THE DAVID A. WELLS PRIZE

In accordance with the will of the late David A. Wells, of the class of 1847, a prize of \$500 will be awarded annually for the best essay upon a subject in any one of a number of branches of Economics enumerated in the will of the founder.

The will provides that if no essay deemed worthy of the prize be presented in any year the award shall be withheld for that year. The successful essay will be printed and

circulated by the college out of the residual income of the fund.

"The David A. Wells Prize of \$500 'in gold coin of standard weight and fineness, or in the form of a medal of gold suitably inscribed, at the option of the recipient,' will be awarded, at the Commencement of 1905, and thereafter annually at Commencement."

Competition is limited by the terms of its foundation to Senior undergraduates and to graduates of Williams College of not more than three years' standing; but, with the exception of the graduates of the classes of 1901, 1902, and 1903, no one shall at any time be eligible for the competition who has not taken Dr. Munro's course entitled, 'Introduction to Political Economy,' and one of the courses of Professor Nelson, the David A. Wells Professor of Political Science.

The following provision of the will of the founder of the competition governs the committee in the selection of subjects and in the consideration of essays:

"No subjects shall be selected for competitive writing or investigation and no essay shall be considered which in any way advocates or defends the spoliation of property under form or process of law; or the restriction of commerce in times of peace by legislation, except for moral or sanitary purposes; or the enactment of usury laws; or the impairment of contracts by the debasement of coin; or the issue and use by Government of irredeemable notes or promises to pay intended to be used as currency and as a substitute for money; or which defends the endowment of such "paper," "notes," and "promises to pay" with the legal tender quality."

The subject for the second competition is:

The Influence of the Church in the Development of English Democracy.

Between the close of the Easter recess and Commencement, 1904, Professor Nelson will lecture on the subject of

the competition to all competitors presenting themselves, if, in his judgment, there is a sufficient number of competitors to warrant him in doing so.

The essays in the competition must be sent by March 15, 1905, to Professor Henry Loomis Nelson, Williamstown, Mass., to whom all communications should be addressed.

The competition for the prize of 1905, with the qualifications already stated, is open to the members of the classes of 1901, 1902, 1903, and 1904.

ADELPHIC UNION PRIZE DEBATE

A public debate is held in the second half-year between three members of the Philologian and three of the Philotechnian societies. The generosity of an alumnus of the college provides for this contest three prizes of twenty-five, fifteen, and ten dollars respectively.

FRANKLIN STORY CONANT PRIZE IN BIOLOGY

This prize, which yields twenty-five dollars annually, has been founded by the Class of 1893, in memory of their deceased classmate, whose name it bears. The award of this prize is made upon the recommendation of the Professor of Natural History, to that member of the Senior class who, in his judgment, is best fitted to profit by advanced biological study. The money thus awarded will be used to pay the tuition fee of such student at the Marine Biological Laboratory, Woods Holl.

CANBY ATHLETIC SCHOLARSHIP PRIZE

A prize of fifty dollars, established by W. Marriot Canby, Jr., of the class of 1891, may be awarded at Commencement to that member of the Senior class, among those eligible, who shall have the highest average standing in scholarship during his course.

Any member of the Senior class who has been in college since the beginning of his Junior year, and who, at any time

during his college course, has represented the college in any recognized intercollegiate contest, shall be eligible.

GREEK PRIZES

An alumnus of the college offers annually, for the present, three prizes of fifty, thirty and twenty dollars respectively, to members of the Junior class who have shown the greatest excellence in the Greek studies of the Sophomore and Junior years.

SPECIAL HONORS

On the recommendation of a department, the Faculty will award any Senior at graduation "special honors" in any subject in which no prizes are offered for the work of the Junior and Senior years, if he has completed at least two elective courses in that subject with a very unusual degree of success. Such "special honors" will be announced on Commencement day, and a record of the same will be printed in the college catalogue.

SCHOLARSHIPS

THE HORACE F. CLARK PRIZE SCHOLARSHIP

The Horace F. Clark Prize Scholarship, in honor of Horace F. Clark, Esq., of the class of 1833, has been established under the provisions of the will of Madame Marie Louise Souberbeille, his daughter, and the income will be awarded as follows:

(1) *For the Freshman year* \$200, to be awarded to the member of the class regularly and faithfully participating in and duly completing the exercises and duties of that year, who upon admission to the college shall have passed a better examination than any other such member of the class.

The examination for this scholarship will be held in Williamstown, on the Monday and Tuesday preceding the opening of the college year in September.

(2) *For the Sophomore year* \$200, to be awarded to the member of the class regularly and faithfully participating in and duly completing the exercises and duties of that year, who shall pass the best examination on certain subjects supplementary to and connected with the regular studies of the course, the sum to be paid at the end of the Sophomore year.

(3) *For the Junior year* \$200, to be awarded to the member of the class regularly and faithfully participating in and duly completing the exercises and duties of that year, who shall pass the best examination on certain subjects supplementary to and connected with the regular studies of the course, the sum to be paid at the end of the Junior year.

(4) *For the Senior year* \$400, to be awarded to the member of the class regularly and faithfully participating in and duly completing the duties of that year, who shall pass the best examination on certain subjects supplementary to and connected with the regular studies of the course, and shall engage to pursue for one year at some academic or scientific institution a course of graduate study (non-professional) to be approved by the Faculty, the sum to be paid one-half at the end of the Senior year and one-half at the close of such year of graduate study. Such graduate student must register his name, address, and course of study with the Secretary of the Faculty not later than the first of November, and must pass a satisfactory examination upon the work assigned. This examination will be held at Williamstown in June.

This scholarship may be withheld whenever, in the judgment of the committee, the result of the competition, in any class, does not justify its award.

The subjects for the examination for the candidates from the Sophomore, Junior, and Senior classes are to be a major and a minor subject chosen from different departments of study. Such subjects must be submitted by the first of November each year to a committee of the Faculty, consisting for the present year of Professors Hewitt and Mears,

and Assistant Professor Hardy. The examination upon the minor subject will be held on the second week in January and that on the major subject in June.

HONOR SCHOLARSHIPS

Several "Honor Scholarships" have been founded by alumni and friends of the college in order both to afford pecuniary aid and to recognize successful scholarship. But under the present system all scholarships are considered "honor scholarships," and therefore these special "Honor Scholarships," five in number, are now merged in the general list in accordance with previous announcements (catalogue, 1898, 1899).

GENERAL SCHOLARSHIPS

The income of the endowments included in the appended list, amounting to over \$11,000 annually, is available for distribution under the direction of the Trustees among those students who are known to need aid. This is given in scholarships to candidates for the bachelor's degree.

The regulations are as follows:

1. Applications must be made in advance to the Committee on Scholarships upon forms provided by the Dean. All scholarships lapse at the close of the college year. Application for renewal, including a complete statement of income and expenditure for the year preceding, must be filed before July 1st upon forms provided by the Committee.

2. All promises of scholarships to students before their admission are provisional. If conditions or deficiencies are standing against the candidate when the college year opens, his scholarship may thereby be forfeited. Scholarships are not assigned to students registering in Group VI.

3. The stipend for Freshmen is uniformly forty-five dollars for the first half-year. For each half-year of the course after the first, the stipends range from forty-five to seventy-five dollars.

A regrading of the stipends will be made at the beginning of each half-year, on the basis of the averages for the previous half, according to the following scale:

| | | | | |
|----------|----------------|------------------------|---------|---------------|
| Group 1. | Upper grade A, | (95 per cent. or over) | \$75.00 | per half year |
| " 2. | Lower " " | (below 95 per cent.) | 67.50 | " " |
| " 3. | Upper " B, | (87 to 92 ") | 60.00 | " " |
| " 4. | Lower " " | (82 to 87 ") | 52.50 | " " |
| " 5. | Grade C, | (70 to 82 ") | 45.00 | " " |

After this year, owing to the increase in the fee for tuition (see page 93), there will be a proportionate increase in the scholarship stipends in the different groups.

4. A Freshman who fails to reach an average of sixty-five per cent. in his studies for either half-year will lose his stipend for the following half.

5. After the Freshman year, a student who fails to reach an average of seventy per cent., or grade C, will lose his stipend for the following half-year.

6. Any one of the following causes may prevent the consideration of an application, or cause the forfeiture, wholly or in part, of a scholarship already awarded:

(a) Evidence satisfactory to the committee that the scholarship is not needed,

(b) Any serious misconduct,

(c) Indulgence in intoxicating liquors,

(d) Expensive habits. Holders of scholarships must satisfy the committee that they are exercising strict economy in respect to lodgings, board, and general living expenses.

7. A scholarship may be restored after the lapse of a half-year, if there is no longer any cause of forfeiture.

In accordance with previous announcement, lists of all holders of scholarship, except Freshmen, are printed in the catalogue, in groups according to grades, without distinction of class.

REVISED LIST OF SCHOLARSHIP FUNDS

| | |
|--|-------------|
| The Henry Titus Morgan Fund, 1883..... | \$81,893.82 |
| The John C. Baldwin Fund, 1871..... | 27,915.14 |
| The William Hilton Fund, 1897, 1899..... | 22,553.66 |

THE JOSEPH WHITE MEMORIAL SCHOLARSHIP

By the will of the late Hannah M. White thirty shares of the capital stock of the New York Architectural Terra Cotta Company (par value \$3,000) were bequeathed to the college for the purpose of founding a scholarship to be known as the Joseph White Memorial Scholarship. The income of this bequest becomes available for the first time this year.

The use of the income of the bequest of the late Henry Titus Morgan, in assisting young men to secure an education, is in accordance with the preference expressed, though

not made mandatory, in his will. By vote of the Trustees the income will be used, so far as may be necessary, to provide Henry Titus Morgan Scholarships for the Freshman class.

The income of \$6,000, the gift of Ebenezer R. Goodnow of Charlemont, will also ultimately be devoted to scholarships.

The Horace F. Clark Prize Scholarship Fund of \$20,000 is not a part of the General Scholarship Fund, its income being distributed as prizes to all successful competitors without regard to their pecuniary circumstances, as is explained on page 85.

EXPENSES

TREASURER'S BILLS

| | | |
|--|----------|----------|
| Tuition, \$52.50 per half-year | \$105.00 | \$105.00 |
| Library | 4.50 | 4.50 |
| Gymnasium | 3.00 | 3.00 |
| Infirmary | 3.00 | 3.00 |
| Room rent, \$4 to \$56 per half-year | 8.00 | 112.00 |
| | <hr/> | <hr/> |
| | \$123.50 | \$227.50 |

GENERAL EXPENSES

The following is an estimate of the necessary expenses for the college year :

| | | |
|---|----------|-------------|
| Board, \$4.00 to \$6 per week, for 36 weeks | \$144.00 | \$216.00 |
| Washing | 15.00 | 20.00 |
| Fuel and light | 8.00 | 18.00 |
| | <hr/> | <hr/> |
| | \$167.00 | \$254.00 |
| Total from | \$290.50 | to \$481.50 |

In addition to these items a fee is charged for the use of apparatus and materials in connection with the following courses :

| | |
|-------------|--------------------|
| Biology 2 | \$15.00 |
| Biology 3 | 15.00 |
| Botany | 5.00 |
| Chemistry 1 | 3.00 |
| Chemistry 2 | 12.00 and breakage |
| Chemistry 3 | 10.00 - " |
| Chemistry 4 | 10.00 - " |
| Geology 2 | 3.00 |
| Art 2 | 6.00 |
| Physics 1 | 2.00 |
| Physics 2 | 10.00 |
| Physics 3 | 10.00 |

A small charge is made in each of these departments for the use of apparatus and materials in connection with the required courses. All fees mentioned in this paragraph are paid directly to the respective departments.

An additional charge of \$9 is made on the last term bill of the Seniors to cover expenses of graduation.

Every student's bill is mailed to him at the beginning of each half-year, and he is held responsible for prompt payment, which is required in advance. In case any student fails to pay by the end of the second week of the term, he may be excluded from all college exercises. No part of a term bill will be refunded for any cause.

Those students who, from choice or necessity, room in town, can obtain rooms at prices somewhat higher than the rates charged in college.

To the above items must be added the expense of furnishing room, cost of text-books, and incidentals. The amount of incidental expenses depends very much on the habits of the student.

Special damage done by students to college property will be charged in their term bills.

Those who enter on an advanced standing, unless they come from another college, pay the following sums as entrance fees, viz.: Sophomore, \$10; Juniors, \$20; Seniors, \$30. This rule is applicable also to partial course students.

Beginning with the year 1904-1905 the tuition will be \$140 a year, payable half-yearly, the fees for the library, gymnasium and infirmary being abolished. The additional charge to Seniors to cover expenses of graduation will be \$10.

COLLEGE ROOMS

The college has three steam-heated and three stove-heated dormitories; the former accommodate one hundred and twelve students and the latter one hundred and thirty-four.

Most of the rooms are double and all are unfurnished. The average yearly rental for each occupant of a steam-heated room is about eighty dollars and in a stove-heated room about sixteen dollars. Students receiving beneficiary aid are expected to room in the cheaper dormitories. A janitor in each of the steam-heated buildings takes care of the rooms. In the other buildings each occupant cares for his own room. No room is secured till an obligation is signed and put on file at the office of the Secretary of the Faculty. On application a list of the rooms giving location and price will be furnished. A student must occupy the room for which he signs, as transfers are not allowed. Each occupant of a college room will be held responsible for any damage done to the room.

Early in May the rooms are rented for the ensuing year. The two occupants of any room can retain their room for the coming college year by signing the obligation. One student can hold his half of a double room by securing a room-mate from his own class or from an upper class. The rooms not thus re-engaged are offered to the classes in the order of seniority. The choice in each class is determined by lot, but no choice is given except to two members of the same class who have signified a desire to room together.

Early in June the steam-heated rooms, not taken by men in college, are open to the entering class in the order of application. To secure these rooms an obligation for the

college year must be given and the first half-year's rent paid in advance. Rooms in other buildings can be secured as soon as the student's entrance papers are accepted and the obligations have been given.

Students about to enter college, who wish rooms in the steam-heated buildings, should make early application to the Secretary. This application does not constitute a promise to take a room, but simply gives an opportunity to do so, and when the applicant's name on the list is reached, a list of the vacant rooms will be sent to him and he can engage a room or not as he chooses.

As the rooms are arranged for two occupants, it is very desirable that students about to enter college should secure their own room-mates before the college year opens. When this is not done, the men will be located in the order of application.

Students who leave college at the end of the college year, as well as those who are to change from one room to another, or from a college room to a private house or a society house, must remove all furniture and other property from their rooms within two weeks after Commencement day. Furniture not thus removed by the owner will be removed by the college employees and stored at the owner's expense. This expense will be collected of students who leave college, when the property is taken away, but in cases of other students it will be charged in the next term bill.

In the stove-heated buildings, rooms which are clear of furniture will be cleaned and necessary repairs will be made. All further changes in those buildings and all changes in the steam-heated buildings are at the expense of the occupant. Second-hand furniture is sold at reduced rates and new furniture can be bought at reasonable prices. All furniture sent by the Boston & Maine Railroad should be sent to the care of Mr. M. M. Watkins, superintendent of buildings.

HOLDERS OF SCHOLARSHIPS

SENIORS, JUNIORS, AND SOPHOMORES, CLASSES OF 1904, 1905, AND 1906

The following list of holders of scholarships is considered an "honor list." It includes the names of none who have not been in college for at least a year, and of none who did not reach at least the grade of C for the last half-year. It therefore excludes the names of all Freshmen and other new students, though they may be having the pecuniary advantage of scholarships.

It excludes also the names of a few students who hold scholarships by special vote of the Trustees.

The list is based on the averages of the last half-year, as is fully explained in section 3 on pages 87 and 88.

GROUP 1—Includes those whose average was ninety-five per cent. or over.

GROUP 2—Includes those whose average was not less than ninety-two nor more than ninety-four.

GROUP 3—Includes those whose average was not less than eighty-seven nor more than ninety-one.

GROUP 4—Includes those whose average was not less than eighty-two nor more than eighty-six.

GROUP 5—Includes those whose average was not less than seventy nor more than eighty-one.

A few scholarships are dependent upon local considerations, or personal nomination. Incumbents of such scholarships are placed in the groups which correspond to their standing, without regard to the actual value of the scholarships which they hold.
